## THE WHITE CITY.

Clear Weather Brings Out a Large Attendance.

The Foreign Naval Officers Pay a Visit to the Great Fair.

The Gates at the Exposition Will Remain Closed Today.

Thomas's Piano and Harp Continue to Attract Much Attention—Flushing Touches to the Grounds.

Fair Notes.

*By Telegraph to The Times.*  
CHICAGO, May 6.—[By the Associated Press.] Today was the first really clear day since the opening of the World's Fair, and the White City at Jackson Park looked more beautiful than at any other time before. About 40,000 people were admitted to the grounds during the day.

The naval officers from foreign nations, who arrived this morning, after being entertained down town during the forenoon, went to the fair this afternoon. They spent several hours there, and will go again on Monday. All express amazement at the magnitude and beauty of the fair.

The piano and harp difficulty and the charges against Theodore Thomas continue to be the chief topics among the officials of the fair. The Special Committee will begin its work on Monday morning. Commissioner Lannan said that, should the charges prove true, they will at once call for Thomas's resignation. It was rumored tonight that the position will be offered to Walter J. Damrosch of New York in case Thomas resigns.

The gates of the fair will be closed tomorrow. President Higinbotham made this announcement today, but when asked what would be done in the future he would not say. The national commissioners still continue to discuss the question, but are undecided as to what action may be taken by that body in the future.

The Chicago Press Club tendered a large reception tonight to the foreign newspaper men of the city, and festive scenes of the Duke and Duchess of Veragua are numerous.

A dispatch from Winnipeg tonight says that Prince Bonaparte is in that city on his way to Chicago to see the fair, he having been on a trip around the world.

The Mayflower Association is something novel, but there was an illustration of it at the Exposition grounds this afternoon, when the Quackah Indians from Vancouver took possession of their new home on the east side of South Pond. The also dedicated the totem pole erected in front of their new shack. They have been quartered in the stock pavilion, attired in their best tribal clothes. They left their temporary quarters and danced to their new home.

The Committee on Agriculture, of the National Commission, visiting the Agricultural building this morning, Commissioner Elboeck of Iowa said that all were greatly surprised at the quality and extent of the exhibit. All agreed that they had never seen an agricultural display to compare with it.

The workmen employed by the landscape gardener of the fair were well employed during last night. They labored by electric lights, and this morning scarcely a vestige of last week's storm remains on the winding streets and paths. What little mud remained last night was pressed out of existence by huge steam rollers, and, now but little remains to complete the roadways.

## FOREIGN JACK TARS.

Many Sailors Have a Glorious Day's Sport in New York.

NEW YORK, May 6.—[By the Associated Press.] This was a great day for the foreign Jack tars now in this port. A series of races were rowed between the different crews, and the weather and water being propitious a glorious day's sport was had. The result was a great victory for Great Britain, her men winning two out of the three races and coming in a good second in the third, which was captured by the Russians. Picked crews from all the foreign men-of-war, except the Highlander, Van Speyk, participated, the Americans being barred, as their boats were lighter than the foreigners'.

## WORLD'S REGATTA.

Preparations for the Great Races Between College Crews.

CHICAGO, May 6.—[By the Associated Press.] At a meeting of the Executive Committee of the Chicago Navy tonight important steps were taken in the preparations for a regatta to be held at Lake Geneva, Wis., August 14 to 24. It was decided to send Frank F. Pratt abroad to confer with the crews at Oxford, Cambridge, Berlin, Dublin and other ports relative to their participating. Another delegate will be sent in a short time to Australia. Yale and Harvard have accepted the invitation on condition that the foreign crews attend, and no official correspondence Cambridge has agreed to come if the American crews participate. A supreme college trophy in the shape of a gold cup will be awarded, which is to be rowed for by college crews only.

## THE TURF.

The Winners in Yesterday's Races at San Francisco.

SAN FRANCISCO, May 6.—[By the Associated Press.] Six and a half furlongs: Broadchurch won, Little Tough second; Vanity third; time 1:22.

Five furlongs: Seaside won, Bordeau second; Alexis third; time 1:04½.

Four and one-half furlongs: El Reyo won, Tigress second; Little Esperanza third; time 0:56.

Four and one-half furlongs: Warpage won, Claire second; Jim Lee third; time 0:56.

Five furlongs: May Bird won, Industry second, Comforter third; time 1:05½.

Four and one-half furlongs: Strathbowen won, Edith second, Brocade third; time 0:58½.

Handicap, one mile: Illume won, Hollie second, Regan third; time 1:05½.

Five furlongs: Hippie won, Chalon second, Lizzie McDuff third; time 1:04.

Steeplechase, full course: Capt. Manning won, Venus second, Big Brown Jug third; time 1:04.

MACKAY'S DOCTORS.  
The Millionaire Declines to Be Bled Financially.

SAN FRANCISCO, May 6.—[By the Associated Press.] The Chronicle publishes the following: "It appears that the doctors who attended John W. Mackay, the bonanza king, recently, when he was shot by W. C. Ripley, are liable to have trouble in getting the amount they consider their services worth. There is a wide difference of opinion on the part of Mr. Mackay and the doctors as to what they should receive, and it is believed that a lawsuit will result if the medical men insist on their bills, for Mr. Mackay is very firm and has a pretty well-defined notion as to what is just. Dr. J. W. Keeney would like to have \$75,000, and Dr. Morse \$50,000. This, Mr. Mackay thinks, is pretty stiff for the five or six weeks that they attended him, and there are deep intimations from him that they will never see the money until they slice these bills down. Dr. Morse was asked about the matter tonight. He intimated that his own bill was correct, but said that he had nothing to do with presenting it, that being left to Dr. Keeney."

## KILLING EVIDENCE.

Murderous Methods Pursued by a Gang of Texans.

In Order to Escape the Penalty of One Murder, 248 Men Were Put to Death—History of a Series of Remarkable Crimes.

*By Telegraph to The Times.*

DENISON (Tex.) May 6.—[By the Associated Press.] Sensational developments are coming to light in the Carlisle-Luttrell murder case at Sherman. The news has become current that Gov. Hogg has written to Judge Brown for the particulars in Charles Luttrell's case, as a pardon has been applied for, and that he wishes to thoroughly investigate the case. It is said Luttrell has divulged information concerning the terrible butchery of women here just spring that will probably secure him a reprieve or possibly a pardon in fall. The exact confession cannot be had, but it is said that since 1878 James M. Brown, John Carlisle and friends have killed 248 men in order to kill testimony against them in their murder case.

Tom Brown, in 1878, became involved in a quarrel with a stable hand and killed him, and John Carlisle was induced to kill another man, named Sparks. Tom Sherman, their last victim, was an eye-witness of the first crime, and there were many others besides who could give strong circumstantial evidence. Brown and Carlisle, being wealthy, started in to kill the evidence against them in their murder case.

## SAILORS' BATTLE.

Midnight Raid on a Schooner at Redondo.

The Haleyon Attacked by a Boat-load of Union Sailors.

The Boarding Party Repulsed by the Plucky Captain.

One Man Known to Have Been Killed, with Possibly Several Wounded—Details of the High-handed Outrage.

For some weeks past there has been considerable trouble at the port of San Pedro on account of the high-handed actions of the members of the Coast Seamen's Union, who, emulating their brethren of San Francisco and other ports, assumed to dictate to the owners and officers of vessels as to whom they should hire to work for them. Only a short time ago two non-union sailors were forcibly carried from a vessel and locked up in a house several miles inland until she had sailed, two days later; and a number of similar acts of violence have been reported of late. Hitherto, the perpetrators of these outrages have escaped punishment, but, emboldened by their success in the past, they ventured beyond their own territory on Friday night last, and attempted to terrorize the captain of a vessel at Redondo Beach, with the result that one of their number was slain, another taken prisoner, and all the rest will in all probability be arrested within twenty-four hours upon the serious charge of assaulting the crew of the vessel with the intent to commit murder.

The details of the affair are as follows: The lumber schooner Halcyon, Capt. E. P. Rice, arrived at Redondo from New York on Wednesday last, with a crew of three non-union men in addition to the captain and mate, and proceeded to discharge his cargo at the wharf. On Friday Capt. Rice was warned that the union men were making preparations to raid his vessel and kidnap the crew, so as to compel him to employ unionists in their places. He immediately called upon Constable Foyer and laid the case before him, whereupon that officer placed one of his deputies on board the schooner, and later in the evening took up a station himself upon the wharf.

After dark Capt. Rice cast off all the lines which moored his vessel to the wharf, and let her drift out for a short distance before dropping his anchor. He then retired, leaving some of the crew on the watch. About 11 o'clock Capt. Rice, on the lookout heard the muffled sound of oars and the squeaking of oarlocks close at hand, and hailed the occupants of the approaching boat. Receiving no reply, he rushed below to awaken the captain and crew, and meanwhile the boat shot alongside and some eight or ten armed men boarded the vessel and commenced firing guns and pistols. With malevolence and oaths they ordered the non-union men to come up on deck so that they could "do them up," and when Capt. Rice emerged from the hatchway they fired at him and ordered him below again. After wounding them, the dauntless captain fired five shots into the midst of his assailants, whereupon they turned and fled over the side of the vessel, tumbling into the water at the water-pell-mell. Their next move was cut the hawser, but Capt. Rice, after warning them to steer clear without avail, again emptied his revolver into their midst, and they pulled away and were soon lost in the darkness.

Yesterday morning, after Capt. Rice had gone ashore, and the vessel had been returned to her berth at the wharf, the crew, while hauling up a bundle of lumber, were astonished to find a man hanging on to the hook, as the bundle emerged from the hold. As he stepped ashore he was promptly arrested by the mate, and turned over to Constable Foyer, to whom he explained that he had gone down into the hold to see a friend of his named Peters. Meantime he endeavored to throw something into the water, but was prevented from doing so, and a revolver, two of the chambers of which had been recently discharged, was taken from him. He was subsequently taken before Justice Harrison, in whose court a complaint had been filed by Deputy District Attorney Davis, who was sent down to investigate the affair, and stated that his name was Bob Peterson. He was arraigned upon the charge of assault with intent to commit murder, and his examination set for tomorrow morning.

Nothing was heard of his companions until later in the day, when word was received from San Pedro to the effect that a coast seaman's boat had been found upon the beach near the breakwater, in which was the corpse of Michael Silver, alias "Frenchy," a sailor who had formerly shipped on the Halcyon, and that it was rumored that Bob Peterson had been shot and fallen overboard in a raid during the preceding night.

Coroner Gates was summoned from this city yesterday afternoon to hold an inquest upon the body of Silver at San Pedro, and an inquest will be held today, and at noon yesterday Sheriff Cline and several deputies left for Redondo in response to a telephone appeal from Capt. Ainsworth, who seemed to think that a fight was imminent between the rival seamen.

It is expected that there will be sensational developments at the inquest, as there are reports that two or more men were killed. The boat in which the dead body was found showed numerous blood stains and some large pools, indicating that others were badly hurt. Tracks leading from the boat also showed that someone had been carried from the boat bleeding profusely. The sailors have so far refused to give any information, but it is believed that the man captured at Redondo can be induced to talk, and when it is learned who were in the attacking party, the investigation can be continued in an intelligent manner.

There is no question but what the commerce of the Coast is being seriously injured by the lawless acts of union sailors, and it is now believed that a concerted effort will be made to ferret out the perpetrators of the crime and bring them to justice.

## The Hotel Arcadia.

The lease for a term of eight years is being made to C. W. Stewart of the Bellevue Terrace Hotel for the Arcadia Hotel at Santa Monica. If satisfactory it will be signed on Monday. The hotel will be painted and thoroughly renovated throughout, the grounds changed and a pavilion, new bath-houses and swimming tank erected at once. In fact it will be made one of the finest all-the-year-round seashore resorts in Southern California.

REDUCED RATES  
AT THE  
Hotel del Coronado

## For the Summer Months

ROUND TRIP TICKETS  
From Los Angeles, Pasadena, Redlands, San Bernardino, Riverside, \$1.00, including one week's board, in \$3.00 or \$3.50 rooms, with privilege of longer stay at \$2.50 per day, will be the lowest rates ever charged in the most agreeable summer seaside resort in California. Outdoor sports of every kind and for all ages are provided. The hot and cold salt water swimming tanks, also the fine sun bathing, are unsurpassed. For any information and for descriptive pamphlets, rates, etc., apply at 129 North Spring st., or address

## Illustrated Lectures.

An interesting lecture was given at the Y.M.C.A. last evening by Prof. J. W. Parkhill on the great cities of the East. His remarks were illustrated by numerous stereopticon views. Starting at Boston, he told his hearers about the most wonderful buildings and places of interest there. From there he took his audience to New York, and then to Philadelphia. After viewing places of interest in those cities the imaginary journey was continued to Chicago and the World's Fair. The picture of the old liberty bell evoked hearty applause, as did also that of Abraham Lincoln.

*It's ineffective, except for the moment—the ordinary pill. Because it upsets your whole system completely, you wouldn't think it's doing you good. It only shocks and weakens your system. Take something that's better. Dr. Pierce's Pleasant Pellets do good that lasts. They regulate the system, as well as cleanse and renovate it; mildly and gently, but thoroughly and effectively—no griping, no violence. They're the smallest and the easiest to take, and are very safe for babies and the best liver pill ever known. Only one little Pellet for a laxative—three for a cathartic. Sicker or Billious Headache, Consumption, Indigestion, Bilious Attacks, &c. All arrangements of the liver, stomach and bowels are prevented, relieved and cured.*

*They're the cheapest pills you can buy, and are guaranteed to give satisfaction, or your money is returned. You pay only for the good you get.*

*Can you ask better proof of the superiority of these little pills?*

**THE MILES TRIAL.**

The Case for the Prosecution  
Finally Closed,

After Another Long Siege of Expert  
Testimony.

A Material Witness for the People  
Fails to Appear.

The Owner of the Machinist's Hammer,  
With Which It is Alleged Miller  
Was Murdered, Was Not  
Produced.

The prosecution in the Miller murder trial got all of their evidence yesterday afternoon and rested the case for the people. There were few points brought out in the testimony given that could be denominated strictly new. The absence of the man who claims to have left the machinist's hammer with Miles on the afternoon preceding the night of the murder is considered a weak spot in the case against the defendant, although the exact nature of what his testimony would have been is not known with any degree of definiteness. Now that the present stage has been reached, and the defense and the jury what facts they have in combat, it is anticipated that a verdict will be reached not later than Wednesday evening next, possibly much sooner.

In summing up, the prosecution has shown that Miles was in the saloon at the time Miller was murdered; that he went back to the rear of the building twice during the evening; that a hammer was found behind the bar, the head of which exactly fitted the fatal wound in the dead man's skull; that there were also found some keys and a poker chip in an old money drawer, covered with stains, and that these stains were blood spots; that Miles had made some remarks which did not please Miles that same afternoon, and that the latter was seen to take something from the safe later and put it into his pocket. Also, that Miles had told an employee of the place that he was in great danger of being "let out" of the Carleton as any one else.

And last, that Miles was in charge of the sale up to the time of the finding of the body of the murdered man. On the other hand, by careful cross-examination, the defense have elicited from the witnesses of the other side that Miles was seen about the bar all the evening on May 16, 1891, and that when he did go back to the rear it was only to be absent for a few moments at a time. That the folding doors between rooms 3 and 4 were found open after the murder, when they had previously been nailed up, and that the footprints of a strange person were found near the rear entrance, and that these were traced far off into the hills and back again with bloodhounds. On this showing the defense base their claim that Miles was not connected with the crime, and promise that their case will be exceedingly short. It is understood that they will move that the Court instruct the jury to bring in a verdict of acquittal.

Yesterday's session of the trial was full or interest, and attracted a large crowd of the curious friends of the defendant and professional men, who had gathered to listen to the expert testimony given by the learned medics. The defendant manifested even more than his characteristic attention, and sat with his hand behind his ear, eager to hear all that was said by counsel and witnesses. Since the first two days of the trial his family have not accompanied him into court, probably owing to the seeming effect to invite sympathy which their appearance suggested.

## MORNING SESSION.

James McLachlan, ex-District Attorney, was called just previous to the resumption of the cross-examination of Dr. West Hughes. His testimony was for the purpose of corroborating the statements made regarding the finding of the poker chips and keys. The witness was with Chief Glass when he found the articles in the old money drawer back of the bar at the saloon.

Dr. Hughes then took the stand. In making his tests of the blood stains, he destroyed the characteristic hemin crystals by succeeding trials. The crystals were of such a nature as to enable their preservation for an indefinite length of time. Stains, therefore, might remain on an article, and yet be distinguishable as blood, for six months or many more years. The first crystal was absolute and certain. Other tests were similar to add to the strength of the experiment. The blood crystals were peculiar to themselves in color and not easily mistaken. They might almost be seen with the naked eye, and quite easily under a glass of twenty diameters. After determining that the substance was blood, it was another question to say what particular kind of blood it was, or from what sort of an animal it came. The doctor would not swear that the blood he examined was human.

Mr. Shin did not get tangled up very badly with the lengthy, technical medical expressions, but he failed to confuse Dr. Hughes on any point of his examination. After having the physician describe his test processes, counsel exhibited several volumes of what he supposed were authorities in the endeavor to shake the testimony of the witness.

Before proceeding further with the cross-examination, Deputy District Attorney Dupuy asked the indulgence of the Court and permission of counsel on the other side to place on the stand Deputy United States Marshal A. W. Marsh, who went to New Mexico to bring back Miles when last arrested.

The permission was granted, and Mr. Marsh was sworn. He said that while on the train en route for this city a brakeman had handed him a paper which contained an article relating to the crime with which Miles was charged. After reading it, the marshal handed the paper to Miles. The defendant read it, and then throwing the paper on the seat beside him exclaimed: "That is the new evidence, is it? They have found the man who left the hammer with him. That does not amount to anything. I have consulted with medical men and I find that a skull or plaster of Paris cast a blow with a hammer may make a large hole than simply the size of the hammer head."

Objection was made to the introduction of such conversation as testimony. The objections were sustained.

Gustave Mathews was one of the brakemen on the train which brought in the deputy marshal and Miles. He had given Marsh a paper and saw Miles read it. As the latter finished perusing the article he threw the paper down and made some contemptuous remark concerning it.

Dr. Hughes was then again called and his cross-examination continued. On the paper wrapped around one of the keys several spots of a red color were noticeable.

Mr. Shin asked the witness if these were on the paper when he received it from Chief Glass.

The witness replied that they were. This followed further description of the blood stain. Fibrin and serum, as components parts of the blood, were not found in the tests. It was not thought necessary to look for them. The tests were made for hemin crystals only. If the coloring matter of blood was found, then blood itself was present. This matter was found in the tests, and for it solely were the experiments made.

I. H. Polk was interrogated for a moment regarding the visit he paid to the Carleton saloon on the day after the murder.

The usual noon recess was then ordered.

AFTERNOON SESSION.

The defense finished with Dr. Hughes soon after 2 o'clock.

John Wooley was then recalled. "I will ask you," said Mr. Gibbons, "if you ever had any conversation with Miles previous to Miller's murder in which the former said that there was a probability of his leaving the Carleton saloon and that business?"

The defense objected to the question, which objection being overruled, an exception was entered, and the witness allowed to answer the question. He said that he had had such a conversation with Miles. Miles told him that he had received a letter from a party in New Mexico making an offer to him to take charge of a hotel.

The answer was ordered stricken out on motion.

Miles also told Wooley that he was just as apt to be let out of the saloon as the former was. Such was the substance of the witness' entire testimony at this juncture, and he was dismissed without cross-examination.

P. T. Trick spent considerable time on the evening of May 16, 1891, in the Carleton saloon. He saw Miller standing near the bar. Miles was behind it. Miller was then facing Miles, the latter being some fifteen feet away. Miller made some remark in a loud tone of voice. After the remark was addressed to him Miles appeared to be angry. Miller was heard to call someone a liar.

"Do you know whether the accusation was applied to Miles?" asked the Court. "No, sir, I do not."

"Now, if Your Honor please," began Mr. Shin, "we move to strike out all the evidence of the witness regarding the remark of Miller and expression of Miles' face."

"It may be stricken out," ruled Judge Smith.

Dr. Granville MacGowan was present at the morgue when the trials with different hammers in the head wound of Miller were made. He identified the machinist's hammer as the one which he had found to fit the hole. He did not make a very careful or thorough examination of the wound, only observing the fit of the hammer. The scalp might have previously been cut and the top of the skull loosened, but he did not believe such was a fact. Altogether, notwithstanding that he was to be used as a witness, his observations were not close enough to lay foundation for exact evidence.

JAMES R. Blanchard, in company with Mr. McCaldin, visited the saloon of Miller & Miles on the night of the murder. The two went to the bar and McCaldin asked Miles, who was behind the counter, for a drink. Miles appeared not to hear him, and the request was repeated, with a like result. Then McCaldin said to Miles: "What the hell—l'm the master with you; are you crazy; why don't you get me that drink?" Still Miles said nothing. A young man came then from the other end of the bar and waited upon Mr. Clegg, and Miles went to the office, swinging open the door, took something out of it, and, drawing back his apron, put his hand into his pocket. He then returned to the other end of the bar and looked down the room. There were some other men standing near the billiard tables.

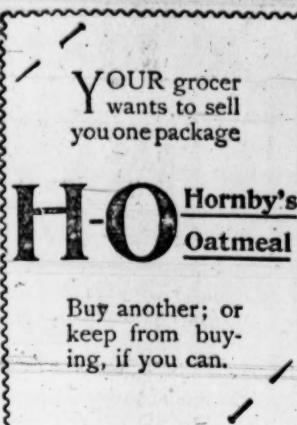

After a short cross-examination, counsel for the defense announced that they wished to ask the witness nothing further.

"We rest our case," said Judge Dupuy, of the other side.

It was then 3:40 o'clock, and as a number of jurors wished to be excused at 4 o'clock, the Court ordered that a recess be taken until Monday morning at 10 o'clock, at which time the taking of evidence for the defense will begin.

## THE MILES TRIAL.

The Case for the Prosecution  
Finally Closed,

After Another Long Siege of Expert  
Testimony.

A Material Witness for the People  
Fails to Appear.

The Owner of the Machinist's Hammer,  
With Which It is Alleged Miller  
Was Murdered, Was Not  
Produced.

The prosecution in the Miller-murder trial got in all of their evidence yesterday afternoon and rested the case for the people. There were few points brought out in the testimony given that could be denominated strictly new. The absence of the man who claims to have left the machinist's hammer with Miles on the afternoon preceding the night of the murder is considered a weak spot in the case against the defendant, and though the exact nature of his testimony would have been known with any degree of definiteness, now the expert stage has been reached, and the defense know just what facts they have to combat; it is anticipated that a verdict will be reached not later than Wednesday evening next; possibly much sooner.

In summing up, the prosecution has shown that Miles was in the saloon at the time Miller was murdered; that he went back to the rear of the building twice during the evening; that a hammer was found behind the bar, the head of which exactly fitted the fatal wound in the dead man's skull; that there were also found some keys and a poker chip in an old money drawer, covered with stains, and that these stains were blood spots; that Miles had made some remarks which did not please Miles that same afternoon, and that the latter was seen to take something from the safe later and put it into his pocket. Also, that Miles had told an employee of the place that he was in as great a danger of being "let out" of the Carleton as any one else. And last, that Miles was in charge of the saloon up to the time of the finding of the body of the murdered man.

On the other hand, by careful cross-examination, the defense have elicited from the witnesses of the other side that Miles was seen about the bar all the evening on May 16, 1891, and that when he did go back to the rear it was only to be absent for a few moments at a time. That the folding doors between rooms 3 and 4 were found open after the murder, when they had previously been nailed up, and that the footprints of a strange person were found near the rear entrance, and that these were traced far off into the hills and back again with bloodhounds. On this side, the defense claim that Miles was not connected with the crime, and promise that their case will be exceedingly short. It is understood that they will move that the Court instruct the jury to bring in a verdict of acquittal.

Yesterday's session of the trial was full or interest, and attracted a large crowd of the curious friends of the defendant and professional men, who had gathered to listen to the expert testimony given by the learned medicos. The defendant manifested even more than his characteristic attention, and sat with his hand behind his ear, eager to hear all that was said by counsel and witnesses. Since the first two days of the trial his family have not accompanied him into court, probably owing to the seeming effect to invite sympathy which their appearance suggested.

MORNING SESSION.

James McLachlan, ex-District Attorney, was called just previous to the resumption of the cross-examination of Dr. West Hughes. His testimony was for the purpose of corroborating the statements made regarding the finding of the poker chips and keys. The witness was with Chief Glass when he found the articles in the old money drawer back of the bar at the saloon.

Dr. Hughes then took the stand. In making his tests of the blood stains, he destroyed the characteristic hemin crystals by succeeding trials. The crystals were of such a nature as to enable their production for an indefinite length of time. Stains, therefore, might remain on an article and yet be distinguishable as blood, for six months, or as many or more years. The test for crystals was absolute and certain. Other tests were simply to add to the strength of the experiments. The blood crystals were peculiar to themselves in color and not easily mistaken. They might almost be seen with the naked eye, and quite easily under a glass of twenty diameters. After determining that the substance was blood, it was another question to say what particular kind of blood it was, or from what sort of an animal it came. The doctor would not swear that the blood he examined was human.

Mr. Shinn did not get tangled up very badly with the lengthy, technical medical questions—but he failed to convince Dr. Hughes on any point of his examination. After hearing the physician describe his test processes, counsel exhibited several volumes of what he supposed were authorities in the endeavor to shake the testimony and knowledge of the witness.

Before proceeding further with the cross-examination, Deputy District Attorney Dupuy asked the indulgence of the Court and permission of counsel on the other side to place on the stand Deputy United States Marshal A. W. Marsh, who went to New Mexico to bring back Miles when last arrested.

The permission was granted, and Mr. Marsh was sworn. He said that while on the train en route for this city a brakeman had handed him a paper which contained an article relating to the crime with which Miles was charged. After reading it the marshal handed the paper to Miles. The defendant read it and then, drawing the paper on the seat beside him, exclaimed: "That is the new evidence, is it? They have found the man who left the hammer with him. That does not amount to anything. I have consulted with medical men and find that on a skull or plaster of Paris cast a blow with a hammer may make a larger hole than simply the size of the hammer head."

Objection was made to the introduction of such conversation as testimony. The objections were sustained.

Gustave Mathews was one of the brakemen on the train which brought in the deputy marshal and Miles. He had given Marsh a paper and saw Miles read it. As the latter finished perusing the article he threw the paper down and made some contemptuous remark concerning it.

Dr. Hughes was then again called and his cross-examination continued. On the paper wrapped around one of the keys several spots of a red color were noticeable.

Mr. Shinn asked the witness if these were on the paper when he received it from Chief Glass.

The witness replied that they were. Then followed further description of the blood tests. Fibrin and serum, as component parts of the blood, were not found in the tests. It was not thought necessary to look for them. The tests were made for hemin crystals only. If the coloring matter of blood was found, then blood itself was present. This matter was found in the tests, and for it solely were the experiments made.

I. H. Polk was interrogated for a moment regarding the visit he paid to the Carleton saloon on the day after the murder.

The usual noon recess was then ordered.

AFTERNOON SESSION.

The defense finished with Dr. Hughes soon after 2 o'clock.

John Wooley was then recalled. "I will ask you," said Mr. Gibbons, "if you ever had any conversation with Miles previous to Miller's murder in which the former said that there was a probability of his leaving the Carleton saloon and that business?"

The defense objected to the question, which objection being overruled, an exception was entered, and the witness allowed to answer the question. He said that he had had such a conversation with Miles. Miles told him that he had received a letter from a party in New Mexico making an offer to him to take charge of a hotel.

The answer was ordered stricken out on motion.

Miles also told Wooley that he was just as apt to be let out of the saloon as the former was. Such was the substance of the witness' entire testimony at this juncture, and he was dismissed without cross-examination.

P. T. Frick spent considerable time on the evening of May 16, 1891, in the Carleton saloon. He saw Miller standing near the bar. Miles was behind it. Miles was then facing Miles, the latter being some fifteen feet away. Miller made some remark in a loud tone of voice. After the remark was addressed to him Miles appeared to be angry. Miller was heard to call someone.

"Do you know whether the accusation was applied to Miles?" asked the Court.

"No, sir, I do not."

"Now, if Your Honor please," began Mr. Shinn, "we move to strike out all the evidence of the witness regarding the remark of Miller and expression of Miles' face."

"It may be stricken out," ruled Judge Smith.

Dr. Granville MacCowan was present at the trial, and when the trials with different hammers to fit the head wound of Miles were made. He identified the machinist's hammer as the one which he had found to fit the hole. He did not make a very careful or thorough examination of the wound, only observing the fit of the hammer. The scalp might have previously been cut and the top of the skull loosened, but he did not believe such was a fact. Altogether, not knowing that he was to be used as a witness, his observations were not close enough to lay foundation for exact evidence.

James B. Blanchard, in company with Mr. McCaldin, visited the saloon of Miller & Miles on the night of the murder. The two went to the bar and McCaldin asked Miles, who was behind the counter, for a drink. Miles appeared not to hear him, and the request was repeated, with a like result. Then McCaldin said to Miles, "What do you want with me? Are you crazy? why don't you give me that drink?" Still Miles said nothing.

A young man came then from the other end of the bar and waited upon McCaldin, and Miles went to the saw, swung open the door, took something out of it, and, drawing back his apron, put his hand into his pocket. He then returned to the other end of the bar and looked down the room. There were some other men standing near the billiard tables.

After a short cross-examination, counsel for the defense announced that they wished to ask the witness nothing further.

"We rest our case," said Judge Dupuy, of the other side.

It was then 3:40 o'clock, and as a number of jurors wished to be excused at 4 o'clock, the Court ordered that a recess be taken until Monday morning at 10 o'clock, at which time the taking of evidence for the defense will begin.

## That Tired Feeling

Nobody is particularly anxious to spend their money. Everybody has to. Your wants must be satisfied and it takes money to do it. A person is not apt to look cheerful over the prospect of spending money—lots of buying is done with a long face; this is all wrong, we offer a change for the better.

## You Feel Relieved

the minute you see our Grand Stock of New and Popular Goods. It looks fresh and desirable. The first glance shows you that you are on the right track. Everything looks inviting. No mistake about this being a modern up-to-the-times line of goods. You wake up to the fact that you have got into the right store.

## The Feeling Grows

when you commence to go into deails. Our assortment is very complete in every department. You feel as if the goods were bought on purpose for YOU. Here is just what you want and a variety of it. No trouble to make a satisfactory selection. It gets down to a question of which is the MOST satisfactory.

## Care Is Swept Away

when you commence to look to the quality of our goods. They make you sure of getting your money's worth. You won't worry after seeing these honest values. They are just your kind of goods. First-class right through. We like to sell a good thing and we do it. You like to buy a good thing and you get it.

## Trouble Is Forgotten

when you learn our prices. They are always at the low-water mark. We don't give away—we can't. We can sell goods very low—we do. This is a fact. We might brag about it, but what's the use? A word to the wise is sufficient. It's as true as truth that we sell goods cheap. We prove it.

Happiness is Supreme  
when you get JUST what you want at less than you expected to pay. We are treating customers to this kind of a surprise every day. We sell you a good article and let you off cheap. You will find our selections choice, our goods reliable, our prices satisfactory. A fair deal makes the buyer happy—WE GIVE IT.

Twenty different persons are apt to guess the missing word. Twenty different persons telling one hundred friends all about their dividend, will make two thousand persons know that we do just what we advertise. Of course, only one person can get the ticket to the World's Fair. You might be the lucky one.

Splendid Bargains Now

## PASADENA.

**Notable Amateur Performance at the Opera House.**

**Baseball and Football—Some of Today's Religious Services—Caring for the Homeless Children—Notes and Personalities.**

A dozen members of the Pasadena Dramatic Club rendered *A Scrap of Paper* very intelligently at the opera house Friday evening in the presence of an audience that was not as large as the merits of the performance warranted. Aside from the too-long waits between the acts, the raising of the curtain ahead of time at the opening of the second act, and the poor manipulation of the stage lights at critical moments, the performance was far above the average attained by amateurs, and compared favorably with the productions of most of the professional troupes that have visited Pasadena this season.

The stage settings were elaborate and highly artistic, while the costumes evidenced careful study on the part of the participants, and were correct in every detail. The honors of the evening were shared by Miss Miller, Mr. Anderson, and Mr. Kyle, while the author of the excellent play, Miller made the hit of the evening. In her almost perfect interpretation of the difficult part which "Susanne de Russelville" assumes in the plot of the play, "Her World," comes favorably up to that of more professional actors. Mr. Anderson fairly excelled himself, as in the part of "Bismarck, landed proprietor and naturalist," he was funny as funny could be, and original as well. His every appearance brought down the house, and his delivery of the catch-phrases was a decided success.

The parts were uniformly well interpreted, as was evidenced by the enthusiasm manifested by the audience on every possible occasion:

*Baron de la Glaciere*..... R. L. Rogers  
And this war..... L. G. Brown  
*Baptiste (servant)*..... Thaddeus Lowe  
*Louise de la Glaciere*..... Mrs. I. B. Winslow  
*Mathilde (sister to Louise)*..... Mrs. T. V. Vanderbilt  
*Mile. Zemobile (sister to Bismarck)*..... Miss Annie Bartlett  
*Monsieur (husband of Mile. Zemobile)*..... Miss Calie Doolittle  
*Pauline (maid)*..... Miss Jessie Cook

## THE PLAINTIFF WINS.

In the case of A. E. Baldwin vs. J. W. Ritzman, an action tried several days ago, in which the plaintiff alleges that \$500 in rent was due him for services rendered the defendant, Justice Lawrence rendered a decision yesterday afternoon in favor of the plaintiff. It seems that the plaintiff has been examined by the witness yesterday afternoon and subjected to a rigid examination in the absence of the opposing counsel, which examination convinced His Honor that there was a preponderance of testimony in favor of the plaintiff. It is stated that the case will be appealed.

**THE HOME NINE VICTORIOUS.**  
A game of baseball was played at Athletic Park yesterday afternoon between the Pasadena Club and the University nine of Los Angeles. The game, which began by the score of 9 to 8. As the figures indicate, the batting was heavy on both sides, but the visitors were outclassed in this particular as well as in fielding. The game was witnessed by several hundred enthusiastic spectators.

Following is the score in detail:

PASADENA.	AB. R. BH. SB. PO. A. E.
Boydton, 3b.....	6 4 3 0 1 3 3
Longhead, c.....	6 4 3 0 1 3 3
Newby, ss.....	6 4 2 2 0 1 0
Amst., 2b.....	5 3 4 0 5 0 1
Kamer, P.....	6 2 1 3 3 3 2
Matenberg, cf.....	6 0 2 0 1 0 0
Palmer, lf.....	6 0 0 0 1 0 0
Bebe, rf.....	3 2 0 0 1 0 0
Totals.....	50 20 19 27 11 8
SUMMARY.	42 9 15 25 27 12 6

**HOME RUNS—BOYNTON.**  
Three-base hits—Longhead, Van Horn. Two-base hits—Longhead, Cowsliter, Martin. Struck out—By Kamer, 12; by Hart, 2; Van Horn, 3.

**PULPIT AND PEW.**

The Sunday evening services at the First Congregational Church will be greater than ever before by the Young Men's Christian Association Club. Good singing, a short sermon by the pastor and other interesting services will constitute the programme.

At the Universal Church, Rev. Dr. Connor presides over the morning and a service in the evening. Some selections on the violin will be rendered by Forest Cheaney or Miss June Reed. The annual meeting of the parish will be held tomorrow at 8 o'clock. Supper for all will be served at 6, and a grand reunion will follow until 10 o'clock.

There will be a "chalk" talk at the Tabernacle this afternoon at 4 o'clock, by Mr. Hitchcock of Los Angeles, which will prove of great interest to the young people and children.

The Young Men's Christian Association will hold a temperance mass-meeting at 3 o'clock in the Tabernacle. Rev. C. L. Jesup of Indianapolis, Ind., the Quaker temperance leader, will speak. The local W.C.T.U. ladies and all others invited. The Prohibition Club, under the direction of F. E. Burnham, will sing several selections.

Rev. T. G. Brownson, president of McMinn College, Oregon, will preach at the Baptist Church this morning.

The revival services at the Christian Church will continue today under the leadership of Elder Wight of Los Angeles.

**LOS ANGELES KICKERS GET THERE.**  
The Los Angeles High School foot-ball team played a match game with the Wilson High School eleven on the Carr tract, opposite the Terminal station. The result was a victory for the visitors by a score of 18 to 6.

The teams were made up as follows:

LOS ANGELES POSITION.	PASADENA
Corson..... R. E.	McGlynn
Ergstrom..... R. T.	Baldwin
Wigmore..... R. G.	Price
Lochard..... L. G.	Edwards
McDill..... L. G.	Cochran
Spence..... L. T.	Bliss
G. Wright..... R. H. B.	J. Craig
Polyk..... L. H. B.	V. Craig
McIntosh..... R. H. B.	Roch
G. Spence, cap..... F. B.	Hart

**THE MONTCLAIR CHILDREN'S HOME.**  
Dr. J. E. Townsend reports that the new home at the Chicago Lava proves well adapted to the work of caring for the homeless little ones. Two infant boys are in the home now for adoption, and a permanent home is desired for a boy of 7 and a girl 11 years old. Visitors are welcome.

**on Wednesdays.** Some of the Sunday schools of the county are contributing to the work by a contribution of 5 cents from each member of the school, which is proving quite a help in defraying the increased expenses.

**PASADENA BREVIETES.**  
Yesterday morning's overland arrived on time.

S. Mills spent yesterday at Long Beach.

A party of Pasadenaans spent yesterday picnicking at Long Beach.

The annual meeting of the Pasadena Ramabai Circle will be held in the Y.M.C.A. room Tuesday afternoon at 2:30 o'clock.

Justice Merriam yesterday sentenced Juan Vasquez to twenty-five days imprisonment, sealing wood from R. H. Pinney.

Prof. L. Whittier is in the course of a week to have his A. & M. in operation between Altadena and the Echo Mountain House.

The Delphi Chautauqua Circle will meet tomorrow evening at the residence of Mr. and Mrs. Stanton on Vernon avenue. The program will be announced by quotations concerning the circle.

At the meeting of the Shakespeare Club, held Friday, the following officers were elected for the ensuing year: President, Mrs. Theo. Coleman; vice-president, Mrs. Case; secretary, Miss Boynton.

Supervisor Cook was in town yesterday to confer with the Lake and River Water Company on matters relative to the laying of pipe on Colorado street for sprinkling purposes east to Lamanda Park. It is likely that some satisfactory arrangement will be arrived at whereby the pipe will be carried out without further trouble.

W. H. Hines, a former popular resident of Pasadena, returned Friday evening from Walla Walla, Wash., where he spent the winter. He was met at the Terminal station by a party of friends who escorted him to the Hotel Viceroy. Yesterday he assumed the management of the Western Union telegraph office here. His experiences up North have made him better satisfied with Pasadena, and he has returned to stay.

To fruit tree planters: The greatest bargains of the year, two-year-old Washington and late Valencia orange trees, and four-year-old root stocks; also, one-year-old lemon buds on three and four-year-old roots, planted anywhere within ten miles of Pasadena for 50 cents each net. Call at 1100 Main Street, California.

The trees unplanted at corresponding low figures. Write at once to Shulman Bros. & Hewitt, Pasadena, Cal.

## RIVERSIDE COUNTY.

**Buildings Offered for County Offices—General Notes—**

The announcement that the Arlington Hotel building had been placed in the hands of H. B. Everest as a candidate for the location of the Riverside county offices, was received by the citizens as much of a surprise. But it is undoubtedly the best arranged building in the city for the desired purpose, as it can, with very little alteration, be made to accommodate, in commodious quarters on the first floor, every county officer, and have several fine office rooms besides. The dining-room could easily be transformed into an excellent hall for the various meetings or banquets, as well as into the main hall, besides the courtroom, as well as into the street. The room is heated by steam, and there is a fine laboratory, with hot and cold water.

The Park Hotel is also mentioned as a suitable location as the site of the Y.M.C.A. and the Frederick Block. They are all near the business center of the city.

## RIVERSIDE BREVIETES.

E. Sanford Taylor and wife of San Francisco were in the city last week visiting Mr. Taylor's brother, James T. Taylor.

The returns of the county elections held last Tuesday will be canvassed by the County Commissioners at a meeting to be held for that purpose on Monday.

Frank B. Devine started on Saturday for a visit of two months in the East.

"London, Old and New," was visited by a large number of people on Friday evening, under the guidance of H. C. Gandy, who has the historic sights seen through his excellent stereopticon, and it was a most pleasant stereo-tour. The audience will take "A Trip to Alaska" next Saturday evening.

A. C. Hale and wife are up from Downey, guest of H. C. Gandy.

Several of the Riverside orange-growers went to Orange on Saturday to attend the meeting held there.

W. A. Correll will go to Nevada City to attend the Grand Lodge Knights of Pythias, which is to meet at Nevada City this week.

Frank C. Foster, a visitor to Riverside last week, is a guest at the Grand Lodge Knights of Pythias, which is to meet at Nevada City this week.

W. H. Utter, upon Emerson's promotion to be a lively race. M. J. L. Trowell and Edward J. Wilson are likely to be the opposing candidates.

James W. Marsh, who is booked for the first marriage license to be issued by the county of Riverside will, on the 15th inst., be united in the holy bonds of wedlock with Miss L. F. St. John.

Miss W. Strange of Los Angeles is visiting friends in this city.

The newly-incorporated Riverside Fruit Exchange, embracing most of the orange-growers of the valley, has organized by electing the following officers: A. H. Moore, president; H. C. Gandy, vice-president; J. Daniels, vice-president, S. C. Evans, Jr., secretary. The directors have not yet selected the treasurer.

W. A. Correll will go to Nevada City to attend the Grand Lodge Knights of Pythias, which is to meet at Nevada City this week.

Frank C. Foster is a guest at the Grand Lodge Knights of Pythias, which is to meet at Nevada City this week.

W. H. Utter, upon Emerson's promotion to be a lively race. M. J. L. Trowell and Edward J. Wilson are likely to be the opposing candidates.

The World's Fair Visitor's Association, of which Mr. O. C. St. Clair of Chicago is president, offers decided advantages to visitors. It controls ten of the best and finest hotels at from \$1 to \$3.50 per day. Room may be seen in action at the agency in this city, 250½ South Spring street, room 102, and that without the necessity of making a deposit before leaving here. It is necessary, however, to register here at least fifteen days in advance.

The best and most reasonable priced refrigerators are now on exhibition. Perfected by Mr. L. Parmeter & Son. We are also offering the largest assortment of decorated chinas ever exhibited in Los Angeles. At New York prices. These are facts. Call and see us. We have the only stock of medevater fountains and fixtures in Southern California. Nos. 232 and 234 South Spring street.

The "Pleasant," the new dining parlor in the new McDonald Block, No. 120 North Main street, is furnishing meals for 25 cents that anywhere else on this coast would cost at least twice as much. Come and fare, considering the price, is amazing. The viands are faultlessly cooked and served under the supervision of Mr. Golding, the famous chef, formerly of the Hotel Green.

School census. Notice to parents. All persons between the ages of 5 and 17 years of age who think their children were not enumerated between April 15 and 30, are hereby invited to call at the office of the City School Superintendent, room No. 23, City Hall, before May 10, and report the same. Parents may also be sent by mail or telephone.

For Catalina Island: Every Saturday until further notice, the steamer Falcon will make trips to Avalon, connecting at San Pedro with Southern Pacific Company's and Terminal Railway's morning trains, returning Monday. For further information apply to the Wilmington Transportation Company, 130 West Second street, Los Angeles.

Los Angeles (Cal.) May 6, 1893.—I have 120 rods of the Keystone suspension fence on one of my places. It was built some months ago and has been thoroughly tested. I consider it the sturdiest and fence I have ever seen. No other fence that I know of will take its place. I am now building more of the same. M. Hogan, M. D.

We have just received a fine line of white metal photograph frames; these goods are equal to any in the market. They are tarnish, and are about one-fourth the price. We are also running a special remaque proof etching at 75 cents, which is an elegant picture for the price. Sanborn Vail & Co., No. 132 South Spring street.

Ladies will give special sale of trimmed hats Wednesday; price \$2.50; they will be fine; more said tomorrow, new lot sailors received late yesterday. 25 cents, 50 cents, 75 cents, \$1.25, \$1.50; in colors, purple, white, black; stock first-class; steeple trimming—prices low. Mrs. F. W. Taurston's milliner's parlors, No. 116 Commercial street.

The mammoth wharf at Port Los Angeles is the largest in the world. Visited by thousands every Sunday. Superb marine and land scenes, fine fishing. Southern Pacific round-trip agents. Hourly trains between the wharf and Santa Monica. See their time table in this paper.

Los Angeles Terminal Railway. One fare for round trip to all principal points. Trains leave for Altadena, 10:30 a.m., 4 p.m., and extra train at 2:30 p.m., Sundays. Last train from 4:30 to 5 p.m. Plenty of time to walk to Rubio, Cabon, and see the mountain incline railway.

Money-raising sale. All goods will be sold at greatly reduced prices until we have \$2500 cash. Fine embroidered silk robes, \$5.00, reduced to \$1.50. JACKETS, crepe silk and velvet. Patterns are the lowest on the Coast. Lee Kwai Sing, No. 306 South Spring street.

Under no circumstances be without It-Bellian's La Grippe Cure! It is an infallible specific for cholera, by aiding nature to regulate itself and throw off disease. For sale by druggists everywhere. 50 cents.

Fifty cents for round trip. Los Angeles to Long Beach and East San Pedro, via Terminal Railway, good going Saturday and Sunday, and returning Monday. Pavilion and bathhouse open for the season.

"I've Adopted, Yet True," the third in a series of popular addresses on Bible characters in Los Angeles at the Y. M. C. A., 3 o'clock this afternoon. All men welcome. Good music.

John A. Logan W. R. C. will give a "shop" on No. 612 South Spring street Wednesday evening, May 10. Admission, 25 cents. All men and friends invited. Refreshments served.

Soldiers' Home loop line is the new way to ride the loop. Lovely ride, grand view while circling the loop. Take 10:20 a.m. train from Arcade depot. Round-trip today 50 cents.

The assortment of furniture at Woodham & Co.'s, No. 324 South Spring street, is good enough for anybody and the prices are down. Investigate before buying.

Dr. Edelman's Skin diseases and diseases of women and children. Consultation free. No. 308½ South Spring street.

The distinguished orator, A. O. Phelps, will deliver his lecture at Turner Hall, Monday evening, May 8, 7:30. "Civilization that Civilizes."

Lord Berkley strain Bremen's Brown's Muffled and Crested Hounds and thirty kinds breeding dogs at low rates; 246 East Sixth street.

Do you need furniture? You can save money by buying it now of Woodham & Co., No. 324 South Spring street. Bed-room suits at cost.

Horses and mules for sale by D. K. Tracy, receiver Pacific Railway Company at stables, corner Twelfth and Olive streets.

Get one of Joe Hobin's \$25 suits to order; world No. 143 South Spring street.

Center pieces and lanterns largest stock. Best designs, the lowest prices at William Clean's, 132-134 Center place.

One hundred dollar gold watch given away on July 1, at 7:30 p.m., by Neigen, the actor; to every purchaser of a \$30 suit and upward will be given a chance. See

DRESSMAKING. Mrs. J. H. Wallace, 12th floor, 217 South Spring street. Our dressmaking parlor. Her fitting is guaranteed perfect, style and finish without equal. Satisfaction is assured. Your material, lace, ribbons, etc., are included in the price. Short notice. Prices reasonable. Popular styles. Call and talk over your needs.

SHOES.

&lt;p

every as he dug and mined, and at the end of that time he threw up the job and left Butte City. Six weeks later he came to the surface as manager of the property. The Walkers, at his advice, bought the mine, and they put him at its head.

## MILLIONS IN COPPER.

While Mr. Daly was managing this he was looking about for other mines on his own account, and he invested in a number of silver mines. I asked him yesterday whether he had ever made any money in silver mines, and he replied that he had, but did not give me the figures. Among the mines he bought was the Anaconda mine, for which he paid, I think, \$30,000. It was begun as a silver mine, but after running down 120 feet the lead developed into one of the biggest copper veins on record. Up to this time not much attention was paid to copper, but Daly organized a company and went to work in this mine. The company consisted of J. B. Haggan of California, the late Senator George Hearst, Marcus Daly and one or two others, and it has materially added to the millions of these well-known millionaires. I can't give you any adequate idea of the enormous extent of these great mines. Two thousand miners were employed in the mines—day and night—and within the last ten years the enormous sum of \$40,000,000 has been spent by Daly in wages and in works for operating these mines. All of this money has come out of the mines, and no one but the owners know how much more the mines have paid. The stock

Cooking beefsteak on a hot shovel.

is not for sale, and the Anaconda mines and smelters form a close corporation. The lumber which is used each month for operating the mine would make a board walk two feet wide from Washington to Philadelphia and 100 cords of wood are eaten up each day in the mine. Three thousand tons of ore are shipped out from the mines daily, and everything connected with them is done after the latest methods with the finest improved machinery and on a gigantic scale.

## THE WORLD'S BIGGEST SMELTER.

These mines are located at Butte City, but the ore is brought about thirty-seven miles here to Anaconda and the biggest smelting works in the world are here. I went through them today. They wall the sides of the mountain, covering more than eighty acres of space with vast buildings packed full of machinery. Great brick chimneys one-third as high as the Washington monument pierce the sky as they stand on the tops of the mountains above the town, and they are connected with the works, by pipes so connected that you could drive a wagon-load of hay through them without touching the walls. This is to give the proper draught. There are vast engines and great boilers and a wilderness of machinery. The fly-wheels of the engines are as high as a three-story house, and the power is conducted by cables of steel which run from one elevation to another up the sides of the mountain. I cannot describe the machinery except to say that the ore-producing rock, containing copper, gold and silver, is pounded into a mush with great stamps, and then filtered and re-filtered, run through process after process, until at last it comes out in the shape of a metal sand, which is taken to other works and reduced to metal. I remember one room on which this sand ran over a hundred and fifty yards long, and these were washed by a running stream of water in such a way that the refuse went off into pipes, while the copper ore remained on the tables. In other vast rooms covering acres were hundreds of grinding machines which made a noise like a sewing machine, and there were acres of settling vats and of almost every imaginable kind of machinery.

## THE ATMOSPHERE OF HELL.

I drove from here to the smelting works and walked through vast rooms filled with fumes of sulphur, which make you feel as though a bushel of matches were being burned under your nose, and saw the roasting of this copper in great iron coffee pots, five times as big as the largest hoghead you have ever seen, and watched the reddish-golden metal pour out in streams and run off in cakes the size of a center table or in blocks like those in which pig iron is cast. A great many of these processes are secret, and electricity is now being used to separate the gold and silver from the copper. The amount of gold and silver in this Anaconda copper is such that it is believed that it will eventually bear the cost of refining and the copper will be pure profit. It takes about two thousand men to work this smelter, and the wages paid them are from \$2.50 up to \$5.00 a day. Everything is done on the strictest business methods, but Daly's treatment of his men is such that he never has a strike, and he stands up for him through thick and thin. It is this fact that makes him such a great power among the people of Montana. He has thousands of employees and his friends are legion. I visited the smelter at noon, and a curious sight was that of the men cooking beefsteak on hot shovels which rested on the kettles of molten copper.

## HOW MARCUS DALY LOOKS.

I met Mr. Daly during my stay here and had an hour's chat with him. He looks a good deal like Proctor Knott of Kentucky, save that his hair and mustache are gray rather than white and his head is slightly larger than Knott's. He is a blue-eyed, rosy-faced Irishman of about 55 years of age. He dresses simply and there are no frills or flourishes about him. He is full of vigor, and when I rode with him from Butte to Anaconda the other day on the trail he wore a soft hat, a rough chinchilla overcoat, a pair of pantaloons which were decidedly without the creases of the New York dude, and his shoes were covered with a pair of rubbers spattered with the mud of Butte City. I found him a good talker and a plain, practical, everyday common sense. He has a bit of a brogue, but his laugh is a hearty one, and he evidently enjoys life. Marcus Daly is married, and he has a very handsome wife and delightful family. He has two daughters, who are going to school in Paris, and his boy, Marcus Daly, Jr., and his youngest daughter, Hattie, a pretty little girl of 7 or 8, are with their mother at the Anaconda Hotel. Mrs. Daly has been mar-

ried twenty years, yet she does not look over 35, and she has as much common sense as her husband. Mr. Daly is especially fond of Hattie. He has named one of his horses after her, and his palace car bears her name. This car cost something like \$40,000. It has bed rooms, parlors, kitchen and bath rooms, and is used by the family when they travel. As for Marcus Daly himself he rides in any kind of a car, and the family live here in Anaconda in the simplest kind of style. This hotel cost something like \$200,000, and is kept up at a big cost. It is owned by Daly, but his rooms are plain, and they are plainly furnished as those of many of his employees' palaces, and his habits are simple in the extreme. He rises at about 6:30 in the morning, takes a cup of coffee and a beefsteak, and is at work before many of his employees are up. He works fast, deciding quickly on everything and showing great executive ability. There is no red tape about his office. Any one who has business with him can get to him at once, and he will not beat about the bush, but comes to business with you at once. He discharges his obligations promptly and always keeps his engagements. Though he is worth many millions, he has entire charge of this great mine property and attends to this in addition to his other business, and his private investments. I am told that there are more than ten thousand dollars cash to do with his ordinary daily, and he has lumber mills and wood cutters, and adds to the whole a first-class newspaper here at Anaconda. The Anaconda Standard is one of the best newspapers in the West, and though it is run at a loss, it has the latest and best news. I am told that Mr. Daly controls \$25,000,000 worth of property in Montana, and it is said that the Anaconda property would bring \$35,000,000 a day. His monthly pay-roll for labor here in Anaconda alone is more than \$160,000, and he pays \$50,000 a month for the coal he uses.

## DALY'S FAMOUS HORSE FARM.

Marcus Daly has some of the fastest horses in the world, and he has a horse farm not far from here which contains about \$1,000,000 worth of horses, and which includes 4000 acres. He is building a big frame house on this now, which will have about twenty-nine rooms, and he says he expects to retire here when he gets tired of work. He has ideas of his own with regard to his horses, and I had an interesting conversation with him today about them. I asked him if he expected to make money out of his horses or if his racing stock was not merely one of the luxuries of a millionaire. He replied:

"Of course, I expect to make money out of them. No one in Montana goes into luxuries of that kind for the fun of the thing, and if I really thought I could not make a profit out of my stables I would sell them tomorrow. I have a theory that the State of Montana will produce the best horses of the world, and I am testing it. The climate here is cold in winter, but the air is pure, and it increases the lung power of the horses. I am told that the boys here at 10 years require suits of clothing as large as those worn by a twelve-year-old boy in the East. The air expands their lungs and they grow big chests, and the same is so of horses. As to the coldness of the climate and the change that colts will not grow here in the winter, if this is true, I expect to overcome it by good stabling and good food. Our grass here is better than that of California or Kentucky, and it makes better bones and better feet. I am buying the very best of stock, and so far my stables are doing very well."

## BUSINESS IN BREEDING.

"How are they managed?" "My farm is run on the same business principles as are the mines and smelters. Everything is systematized and kept in book shape. Every saddle and bridle is charged, and if a halter strap is broken it has to be brought back before a new one can be given out. I know what a cent what everything costs, and I keep two sets of books, one of my racing and the other of my breeding stables. I have weekly reports, and I know just exactly on what horses I am making and on what I am losing."

## A FORTUNE IN HORSE RACING.

"How did your stables pay last year?" "Fairly well," was the reply. "They netted me something like \$127,000, and they cost about \$72,000, I paid \$10,000 for Tammany when I bought him as a yearling. He won \$78,000

last year, and he will probably win at least \$50,000 this season. He is now 5 years old, and I will take him off the track after this season and breed him. To show you how I run the stables: When I bought Tammany I, of course, charged the racing stables with him. All the expense of keeping him has been charged to him, as well as every other item that he has cost. I also charge against him 6 per cent on the amount invested in him, and the difference between the cost and the amount he brings gives me the profit I make out of him. When I take him over to the breeding stables I will charge the breeding stables \$50,000 for him and will credit that amount to the racing stables. A regular record will be kept of his colts, and he ought to produce thirty or forty a year, which at 11 months old will be worth \$1000 apiece, and in some cases will bring as high as \$10,000 each. I will only keep the best colts, and of my breeding I regularly weed out the cults. Most of these colts will be charged in turn and the two stables will be kept entirely separate, so you see I can tell to a "T" just where I am making or losing."

## DALY ON HORSE TRAINERS.

Marcus Daly has the best horse trainers in the United States. Every one knows of Matthew Byrnes, who is at the head of his stables here, and who gets, I am told, something between \$10,000 and \$15,000 a year. His jockey stable, and his horses were covered with a pair of rubbers spattered with the mud of Butte City. I found him a good talker and a plain, practical, everyday common sense. He has a bit of a brogue, but his laugh is a hearty one, and he evidently enjoys life. Marcus Daly is married, and he has a very handsome wife and delightful family. He has two daughters, who are going to school in Paris, and his boy, Marcus Daly, Jr., and his youngest daughter, Hattie, a pretty little girl of 7 or 8, are with their mother at the Anaconda Hotel. Mrs. Daly has been mar-

ried twenty years, yet she does not look over 35, and she has as much common sense as her husband. Mr. Daly is especially fond of Hattie. He has named one of his horses after her, and his palace car bears her name. This car cost something like \$40,000. It has bed rooms, parlors, kitchen and bath rooms, and is used by the family when they travel. As for Marcus Daly himself he rides in any kind of a car, and the family live here in Anaconda in the simplest kind of style. This hotel cost something like \$200,000, and is kept up at a big cost. It is owned by Daly, but his rooms are plain, and they are plainly furnished as those of many of his employees' palaces, and his habits are simple in the extreme. He rises at about 6:30 in the morning, takes a cup of coffee and a beefsteak, and is at work before many of his employees are up. He works fast, deciding quickly on everything and showing great executive ability. There is no red tape about his office. Any one who has business with him can get to him at once, and he will not beat about the bush, but comes to business with you at once. He discharges his obligations promptly and always keeps his engagements. Though he is worth many millions, he has entire charge of this great mine property and attends to this in addition to his other business, and his private investments. I am told that there are more than ten thousand dollars cash to do with his ordinary daily, and he has lumber mills and wood cutters, and adds to the whole a first-class newspaper here at Anaconda. The Anaconda Standard is one of the best newspapers in the West, and though it is run at a loss, it has the latest and best news. I am told that Mr. Daly controls \$25,000,000 worth of property in Montana, and it is said that the Anaconda property would bring \$35,000,000 a day. His monthly pay-roll for labor here in Anaconda alone is more than \$160,000, and he pays \$50,000 a month for the coal he uses.

"No, not now," was the reply. "I am closing out my trotting stock as fast as possible. I don't believe that trotting is legitimate sport. It is the result of mechanical training and mechanical breeding. I prefer to devote myself to running stock and I believe that there is more money in it. The earning capacity of a running horse is much greater."

"How about the record? Has it reached its lowest limit?"

"No, I believe not. I expect to see a mile trotted in two minutes before I die."

"How about the racing record? Will that be lowered?" said Marcus Daly. "It is true a phenomenal horse may come which will cut it down below 1:55, the record now held by Salvador. There is a limit to the physical possibility of a horse, and 1:55 is very fast time."

ENGLISH HORSES CAN'T BEAT US.

I remember having my own eyes suddenly opened wide a few years ago. I was training at Traver's Island. A discussion on the matter had ended in my offering to allow another athlete fifty yards' start in a hundred, to walk and I to run. He was in ordinary attire. Under these circumstances I felt certain that whatever chance he might have had to win the race would be gone.

We took our places on the track, the starter standing between us. The race was "just for fun," and I watched the starter's finger, determined, if possible, to "beat" him as well as the walker. As his finger pressed the trigger I started. He saw me moving, but it was

## WALKING AS A SPORT.

Main Office: Rooms 64 and 65, Stowell Block, 226½ South Spring street, opposite Los Angeles Theater.

The question of gravel pits had a gentle airing by the bird of the famous wing last Sunday, and, judging by the effluvia from the end of town where they are located, it is more than the pits themselves have had for numerous moons.

But the Lord knows they need it bad enough!

While sitting up here blinking in the sun the other day, and wondering why everybody does not get in and do right, and do what they get paid for doing, a postman with a large wad of mail came around the corner and tossed me up a letter.

You may not have seen him do it, but the postman and the Eagle bird understand each other, and here it is:

Los ANGELES (Cal.) May 5, 1883.

To the Eagle bird: Allow me, in behalf of over one hundred of my neighbors and friends, to hearten you for the valuable assistance rendered in last Sunday's Times. I live adjoining one of these gravel pits, that is over twenty-three feet deep, and contains stagnant water with a thick green scum over it, emitting an offensive odor, that myself and neighbors are obliged to bear. Many of my neighbors are sick, and six or eight of our neighbors are the same. The Health Officer has been notified personally, the City Council and City Attorney have been urged repeatedly and persistently, and every means in our power has been employed to induce them to pass an ordinance prohibiting the excavation of these malaria-breeding pest holes, for the purpose of removing the gravel and leaving them open.

I am sure from the silent contempt with which our petitions have been treated, one would think that the members of the City Council are getting too much out of this business from the contractors to have an ordinance of this kind go into effect. About the only thing that remains left for those who are paying for city government, getting none, is to appeal to the American Eagle and our fellow-citizens to aid us in compelling the City Council to do what they know to be their duty, and what they were elected to do. We are obliged to the people living in that section, but it is a grace to the city to allow these holes to be excavated, and it is ten times worse for them to be allowed to remain open.

It sounds real comforting to hear somebody command the utterances from this book, for, as a rule, the only people who have anything to say to me are the breed of sensualists of whom some other sort of cattle, who hop and roar at such a rate that the screech of a cable car going around the corner gets lost in the shuffle. Of course they have no occasion to utter their gutteral jags of thought, but I presume that if some of them didn't spit venom at the Eagle bird they would bust right open.

But, speaking of those gravel pits, where the hoarse whoop of the bullfrog leaks out from the noisome scum, and the malaria and miasma rises up in raw

chunks and makes ill the neighbors therabouts, it is a blooming shame that something is not done about them, and if the people out in the neighborhood of 1800 and something Wright street should take it into their heads some day to decorate a few telegraph poles with the corpses of Councilmen and others in authority, who could blame 'em!

Blamed if I could!

This Board of Trade sign on the gable end of the ex-livery stable across Broadway, from where the Eagle lingers in the gloaming, is rapidly giving divers sorts of strabismus, and I wish somebody would fix it pretty quick, or what little reason I've got will suffer on its throne.

Some time, when you are meandering around this part of town, just squat your eye at that sign, if you want to think you are loaded.

Verily, it is the most disreputable lay-out of a sign the Eagle bird knows of, and if I wasn't away up here out of reach of jags and things like that, I declare if I wouldn't think I had one onto me.

The letters were once nailed up there in a circular shape, and I presume, spelled out the name of the August, September and October body which meets over there in a backroom and sits on the people who are bust up in business; but now some of the letters have entirely disappeared from the legend, and two-thirds of the remainder are dangling precariously and otherwise, in such a fashion as to make symmetry a hollow mockery, and to turn order into chaos equal to a legislature in bleeding Kansas. Will the people on the Building Committee add to the mortgage on that piece of property a sign that isn't a disgrace to this entire section of the city!

If they will, and will do it quick, all will be forgiven and no question asked.

The Eagle bird does not haunt cemeteries very much as a rule. For he does not like to linger where the tombstones spills out the virtues of those who lie.

"Under the sod and the dew  
Waiting the judgment day."

but the situation is such in certain sections of that burying ground over on Boiled Heart—more familiarly known on the map as Boyle Heights—that I can't keep my famous eye off of it, nor keep still this scream about it any longer.

Of all the places the spot where people lie asleep in such position that they can't help themselves is the one of all the earth that should be kept trim, tidy and always in order. But what is the state of affairs in the God's acres I have been telling you about?

Please, you can litter the quiet mounts and encroach on the paths, old bottles and other species of junk linger on the scene in dire confusion. Many of the fences lean and totter, and the whole situation is such as to make doubly sad those who go there with already more sorrow than their bursting hearts can bear.

How would it do to take a few days off with a wagon and have a grand clean-up of debris in that quarter?

Or, if the people who boss that ranch of dead are too tired to do this, why not turn loose in the inclosure a flock of goats, and let them eat up the oyster cans, the beer bottles, the cheap vases and the withered wreaths and roses which are such abysmal eyesore to even a bird of the air!

In this beautiful land, where the roses grow rank from May to May, "and spend their odorous richness through the year," while the honeysuckle blooms so easy and the verbena and geranium grow like weeds on

a Kansas upland, there would seem to be no reason for letting any portion of a burly place look as if double-triggered lightning and three different brands of a Mississippi cyclone or tornado, whichever you have a mind to call it, had struck the place all at once.

Decorum is certainly due, not only the conduct of the populace in a place where the helpless dead lie waiting, but it is just as meet in the inanimate surroundings, and, as this is the Columbian year, it would not be amiss, it strikes me, to have a kind of world's fair over there on the ridge and clean up.

And the Eagle bird will ever prey!

THE EAGLE.

The Prodigal Father has had a great voyage at the Los Angeles Theater for the past three nights, and it worthily deserved the large and delighted audiences that have greeted it at each performance, for it is one of the brightest comedies seen here since *Nlobe* came and went. It has a clean-cut plot, amusing situations and a dialogue that is witty to a degree, while the people in the play are fully up to the merits of the vehicle in which they appear.

Carmencita adds to the attraction, to be sure, but the play and the players are amply able to travel on their own shape.

Mrs. W. J. Florence comes to the Los Angeles Theater for an engagement of two nights, Tuesday and Wednesday, May 9 and 10, presenting the brilliant comedy, *The Mighty Dollar*, in which Mrs. Florence will be seen in her worldwide famous character creation, "Mrs. Gen. Gilfory."

*The Mighty Dollar* is a play depicting with a graphic and scathing satire the corruption and all-devouring passion for wealth and influence, which is a dominant characteristic of the American people. The dramatic persons are distinctly national types, and are drawn with a bold and skillful hand. The whole atmosphere of the play is intensely American.

Chief among the roles of this comedy is that of "Mrs. Gen. Gilfory," a merry, gossipy w<sup>m</sup> who has "lived so long abroad, you know." What a droll mixture of affection and good humor, of social ambition and generosity, this widow is. She is, above all things, a match-maker. She is always ready to help any one in distress, from lobbying for a railroad recompensing dislocated lovers. "It is the dream of her life to marry her niece, 'Libby' Dyer, to 'Lord Cairngorm' from England. Perhaps the funniest thing on the stage today is the comic interlacing of French with English in all the widow's talk. She is always witty, wholesome, satirical and true to nature.

She is always witty, wholesome, satirical and true to nature.

Mrs. Florence wears a succession of gowns during the course of the play which are of a character to astonish the natives. In the fourth act of *The Mighty Dollar* she will wear a magnificent ball costume which is made to represent a gorgeous peacock. The idea is decidedly novel, and is a grand triumph of the dressmaker's art. The first evening of the engagement is the occasion of Manager Harry Wyatt's benefit, and a great audience may be anticipated.

The regular stock company at the Park Theater gives way tomorrow night and James M. Ward and Carrie Clark Ward and their own company begin a two week's engagement, opening in McCloskey's four-act melodrama, *Through Daylight*. Mr. Ward is the head of the veteran actors of the Pacific Coast and has played here many successive seasons.

The play is of a sensational character, full of thrilling situations, and will be put on the stage with special scenery and many new and interesting mechanical effects. Mr. Ward and his accomplished wife as "Mr. and Mrs. Mickey Corrigan" introduce many pleasing specialties, and as they are supported by what is said to be a capable company, the audiences at the Park are quite sure to be well entertained for two weeks to come.

The famous Boston Howard Atheneum Star Specialty Company comes to the Grand Opera House next Thursday, Friday and Saturday evenings, with the usual matinée.

We are assured that this company has a coterie of guaranteed exclusive features which will certainly create a vast impression and delight every evening during their engagement here. First on the list is Miss Ena Bertoldi, an importation from the Neurath Circus. She is a graceful young acrobat, who performs the astonishing feat of dancing on her hands and actually waltzes with her feet in the air. Miss Bertoldi not only walks and dances on her hands, but performs all manner of other difficult acts upon them.

A portion of the performance is thus described. "It was only a few moments before the little performer came running on to the stage, and while waiting for the floor on both hands, like a boy about to make a hand-spring, and executed several pretty polka steps as easily as if she were using her tiny feet. Then with a laugh and 'Here I go,' she threw her heels in the air and began to walk steadily down the stairs until she finally reached the floor, and with a somersault landed squarely on her feet. Then she balanced herself on the back of one chair. With her feet in the air and over the space of several feet she jumped on her hands to the back of another chair." Others in the great company are "Kara," the young Bavarian juggler; the well-known queens of song and mimicry, Miss Janet Melville and Eve Stetson;

IN THE LOBBY.

Marcus Mayer has retired from the management of Fanny Davenport.

Minnie Palmer has brought a suit for divorce against her husband, John R. Rogers.

Charles Dixon is soon to play the leading part in his new comedy entitled *A L— Fool*.

Young Lawrence Hanley's tour through Georgia with Blanche Marcellin's tragic comedy, *The Player*, is the biggest success this season in the South.

"Baroness" Blanc, who stranded in San Francisco not long since, is now in Chicago, where it is said she is about marrying Thomas Williams, a rich and sportive Californian.

Margaret Merrington, the author of E. H. Southern's new play that is soon to be produced, was born in England, but was educated at the Convent of the Sacred Heart at Rochester.

Lottie Collins has picked up \$80,000 this season in America with "Tara," and comes back next season at the head of her own company, when she will probably lose it—or ought to.

Mrs. Alice Shaw, "La Belle Sifflue," has returned to London from India, and her next engagement will take her to the variety stage, where she may pucker up her pretty lips and whistle to her heart's content.

## POPULAR CLOAK AND SUIT CO.

Grand Special Sale

This Week.

Monday Tuesday Wednesday

Ready-Made Suits and Waists

Blazer suit and cambric waist.....\$4.50

Blazer suit and silk waist.....7.50

Eton suit and sateen waist.....6.50

Our first Spring and Summer Special Sale of ready-made Outfitting Suits and Waists begins tomorrow (Monday), continuing three days, and the bargains we will offer have never been equalled in this city—Ready-made Suits being a specialty with us.

Thursday, Friday, Saturday.

JACKETS! JACKETS!

Blazer jackets, all shades.....\$1.50 each

Reefer jackets, all shades.....2.50 "

Reefer jackets, pearl buttons.....5.00 "

Cape jackets, fine finish.....5.00 "

We have a very large stock of jackets and are determined to reduce it at any price—We have all styles and sizes, and our stock is new. The above prices will only be for the three days as advertised.

Parties living in the country can have goods sent C.O.D. by Wells, Fargo & Co.'s Express, or on receipt of postage money order. Careful attention given country orders. Bust measure only required in ordering.

Send name and address for our new Spring and Summer Catalogue.

Popular Cloak & Suit Co.,

217 S. SPRING ST.

N.E. corner of First and Broadway. Telephone numbers: Editorial, 674; Business office, 29  
EASTERN REPRESENTATIVE: H. D. LACOSTE, 38 PARK ROW, NEW YORK.

Founded December 4, 1851.

## The Los Angeles Times

MEMBER OF THE ASSOCIATED PRESS.

VOLUME XXIII.

TWELFTH YEAR.

TERMS: By Mail, \$9 a year; by carrier 85 cents a month, or 20 cents a week. Sunday Times, \$2 a year. Weekly, \$1.30; 6 months, 75 cents.

Guaranteed Net Daily Circulation, April, 12,438 Copies.

Trebling the net circulation of any other Los Angeles daily paper.

Entered at the Los Angeles Post Office for transmission as second-class mail matter.

**A Critical Situation.**  
If the present status of monetary affairs continues, the Government will be compelled to take some decided step before long, and that step will probably be the payment of its obligations in silver. While it is estimated that there is \$618,000,000 of gold in the country, of which \$518,000,000 is in circulation, it is entirely optional with the holders whether they allow it to flow into the National Treasury or not. Any obligation to the Government may be discharged in silver. For almost a year past the receipts of gold by the treasury have fallen off to an alarming degree, and the Secretary has been obliged to trench upon his \$100,000,000 reserve to meet obligations.

In the defeat of his much-cherished Army Bill, Emperor William learns that even a monarchy has its limitations now-a-days, and that the people are the real power behind the throne. Constitutional government has scored a great triumph.

The rush of visitors to Chicago for the opening of the fair is not meeting the anticipation of Chicago people. There are still a good many \$5 and \$10 a day apartments that are not let, and the proprietors are loosing anticipated fortunes thereon. It is manifest that the country at large is not going to be precipitate about the matter. People will wait until they are satisfied that the fair is at its best and many will wait further until they are assured that they will not be robbed when they get to Chicago. The first hurry of exorbitant charges may effervesce and work itself off by and by.

The Association of Horticultural Commissioners of Southern California held a meeting in this city yesterday, and accepted the gauge of battle thrown down by the State Board of Horticulture at its recent session. The commissioners reiterate their charge of incompetency against the State board, and cite facts to prove it. They denounce reports promulgated from headquarters as false and mischievous. They deny the authority of the board to discharge the horticultural commissioners of Southern California, and deny its authority to rescind the action of the San Jose meeting, calling the next State horticultural convention at Los Angeles. The big men have got their blood up and they mean war to the knife, and knife to the hilt. Southern California does not propose to be "tromped" on by any set of overbearing officials.

A LEGAL and legislative authority furnishes us an interesting communication on the subject of claims against the State, calling attention to a law enacted by the last Legislature, which has an important bearing on the subject. The law authorizes claimants, whose claims have been rejected by the State Board of Examiners, to bring suit against the Commonwealth, before a court of competent jurisdiction, the same as they would sue an individual or corporation. This opens the way to a legal adjudication of all claims, and our correspondent urges, properly, that no more special legislation should be allowed to meet such demands, except in very unusual cases. If a claim has failed to run the gauntlet of the State board, it is much better to have its merits passed upon by a tribunal of law than have it turn upon the arbitration of a political body.

The orange-growers of Southern California expect to have another general rally in this city next Tuesday to take further steps for organizing to better their market. The Riverside plan seems to have met with general favor, and there is little doubt that local organizations will be formed throughout the Southern orange-growing belt. The growers of each neighborhood who produce fruit that grades about alike will form their cooperative union to control the packing, branding and shipping of their product. Each of the sub-organizations will have a representative in a district organization, and each district will be entitled to a membership in the executive board. This board will have a general supervision of affairs, receiving and promulgating information about markets, quotations, etc., and designating most favorable points of shipment. It is probable that at the meeting on Tuesday there will be a full attendance, and the working details of the plan will be fully elaborated.

The attempt of a gang of union sailors to board the schooner Halcyon at Redondo Beach on Friday night, capture the vessel by force of arms, and take the non-union crew off, was met by the resistance which it deserved. When men voluntarily take to free-booting, they must expect to encounter the fate of free-booters. The shooting of a couple of the gang is as justifiable as would be the shooting of burglars who might attempt to invade a man's house at midnight. We are glad that the reckless representatives of the Seamen's Union who have been carrying things with a high hand at most of the Pacific Coast ports, overriding the law and intimidating non-union sailors, are at last meeting some stern material that will not consent to be bulldozed. Public sentiment will sustain the masters of vessels who are willing to fight for the protection of their property, and sailors who will fight to maintain their right to labor without submitting to the dictates of a union. While the contest is on, it may as well be carried to its legitimate conclusion. The Seamen's Union has forfeited its right to exist, and should be utterly destroyed, unless it utterly, openly and authoritatively repudiate as a body the acts of individual law-breakers in its ranks. The men who have committed crimes in its name should be punished as they deserve.

## CURRENT HUMOR.

She so shamed that he had-beaten old scamp! Why I heard that he had-blackballed every club in town. He thinks why he married; for a home.—[Life.]

Wife. I have just been to the dentist's and had a tooth drawn. I am in a great deal of pain. Lucky tooth! It is now beyond the reach of your tongue.—[De Soremesa Collector.] Mr. Trager, will you subscribe toward the decoration of the soldiers' graves? Mr. Trager. No, sir! The men whose graves I want to decorate ain't dead yet.—[Life's Calendar.]

Voice.

It's Cholly.

Maudie. Oh, I just knew it was you!

I felt your presence near me.

Well Trained.

[Clothing and Furnisher.]

Bunker. You say you jumped on the cowcatcher of the approaching engine and thus saved yourself. Where did you acquire such agility?

Hill. I haven't been courting a girl who wears crinoline for nothing.

Mrs. Cynthia Jackson (of York State). Goodness me, Eben! I never did put much faith in them humorous papers and their talk about Chicago women's big feet—but just look there!

Magnesia.

[Chicago Record.]

Maude (at the telephone.) Who is this?

Voice. It's Cholly.

Maudie. Oh, I just knew it was you!

I felt your presence near me.

Well Trained.

[Clothing and Furnisher.]

Bunker. You say you jumped on the cowcatcher of the approaching engine and thus saved yourself. Where did you acquire such agility?

Hill. I haven't been courting a girl who wears crinoline for nothing.

# J. T. SHEWARD

113-115 NORTH SPRING ST.

→ This is Los Angeles' greatest dry goods house. The growth of this business the past year stands without a parallel in the history of the dry goods trade of this city. Everything just, everything honest, everything that is fair, is the motto we stand by. Growing today faster and more solidly than ever before.

**TABLE LINENS**—the kind that are all linen; even, round, well twisted thread made out of pure flax and bleached by the best bleachers in the world. It is false economy to economize in the buying of linens because the price is five or ten cents a yard less where cotton is mixed. All linens are worth buying, part cotton is not. Our linen man knows what good flax is, he knows what kind of linens are best for wear. We pay him for his judgement; he was raised in a flax country and knows the merits of linens. We sell all linens as cheap as you can buy a cotton mixture. *We never sacrifice quality for profit.* Today selling more linens than any other three houses in the town. Bleached Napkins, special, \$2.50 a dozen; you should see the quality, that is their recommendation; they were made in Germany; the Germans make heavy thread linens and they always wear well; there is something substantial about them.

**NONE SOLD TO DEALERS.**—Extra good Leghorn Hats, black and white, 25c. We are nearing the end to this bargain. Children's School Hats 25c.

**IT'S A PUZZLER** to some to know how we find time to write so much advertising. We keep our thinking apparatus on the move and keep the lazy part well in the background. When we get lazy the salespeople fall into the same rut, and oh! how lazy and tired they get with a little encouragement. All-wool Blazers \$3; grays only; all sizes; tan blazers \$4; all-wool cape newmarkets in five shades, woolen, \$5; down from \$12. This does not encourage lazy clerks; it keeps them busy showing the goods. Linen and silk traveling dusters, calico and cambric wrappers for lounging around, \$1.50 to \$4; perfect in fit and well made.

**LINEN and Silk Dusters** for traveling. All-wool Dusters, all wool light weight Cape Newmarkets, \$5, down in price from \$12. Satchels, Handbags, Valises, Traveling Companions—are you going to travel?

Colored Velvet Ribbon in a large assortment of colors. Take the elevator to the Millinery Dept. Best assortment in town, they all say.

**SPECIAL OFFER.**—Any lady who buys the material for a cape on Monday will have the cape cut free of charge. Broadcloths \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50; blacks and all colors; 2 $\frac{1}{2}$  to 3 yards makes a cape. If we cut them they will fit you. Madam Purnall has been our cloak fitter for the past four years, and she knows how a cape should look. They will be cut in any style to suit you; they will be basted ready for you to do the sewing. This is Sunday. A scriptural quotation will not be amiss: "What Madam Purnall bastes together let no woman pull asunder." Free cutting of capes Monday. No other day.

**AN AID TO GOOD DIGESTION**—Pure white table linen and napkins; all linen 50c, 60c, 65c, 75c, 85c, 90c, \$1; all linen napkins \$1.50, \$1.75, \$2; special value \$2.50. White goods, checks, nainsooks, plain nainsooks; striped nainsooks; Swisses, dotted and plain. White bedspreads \$1, \$1.50, \$2, \$2.50. Scotch and Irish crashes, Russian crashes; none better in the world for wear; American crashes, the only thing in linens manufactured to any extent in America.

**THE TIME HAS GONE BY** when people can be coerced into buying goods. Years ago it was the style to get hold of a customer and force them into buying before they left the house, and, strange to say, this is practiced in a meager way now in some of the stores of today. If you want to buy a Cloak you do not want to be coerced into buying something you do not want. We invite lookers and sight-seers. If you buy a pattern and would like to see how our Capes are made, pleasure will be taken in showing you. Our Cape stock is taking on more life as the season advances. Capes are the ruling feature in the realm of cloakdom. We show the largest stock in every way and at every imaginable price. Capes from \$5.00 to \$15.00 is where the largest stock is carried. Tans, brown, gray, blue, green, red, black and several new and desirable shades. Capes with Elizabethan and Butterfly Collars—the standards of the cape trade. Special values, \$8.00, \$10.00, \$12.00 and \$15.00.

**WHIPCORDS** and Bengalines, two of the quickest steppers in the dress goods string. Ask for any shade and we have it. Anything in greens? Yes, plenty; more than plenty if you take the different styles and different weaves as we present them to you in the 100 feet of dress goods selling space. Trade keeping up an even pace with the growth of this big prosperous town. The integrity of our statements is never doubted. Truthful advertising presented in a truthful way brings confidence and trade. Dress goods doubling sales over a year ago. Plaids 25c to a dollar; checks and stripes, all wool, 50c to a dollar. A year ago we started in on early closing; a couple or more followed suit; they have long since dropped by the wayside, and we come up smiling each night at 6 o'clock and close the doors—a retrospect. This house has shown a big, steady increase from the start. It today overshadows all others in trade. You see double the number of packages from this house than from any other on the street; you see a happy, contented lot of clerks; you note prosperity on every hand. Do these would-be early closers of times past show the same prosperity? Do they sell one-half the goods they did a year ago? No; emphatically no.—another retrospect. It pays to be liberal with the public; it pays to have an idea and stick to it; it pays to be courteous and attentive to the wants of the trade; it pays to be watchful. Little flights of fancy mean a loss of gun powder; stick to it and add more powder is the way to win a battle. We advertise probably more than any one else. Does advertising pay? Would we do it if it didn't pay? Two kinds of advertising—one to catch confidence, the other to catch suckers. What kind of game are you looking for? Trade largely increasing over a year ago. Where is the dividing line between good business and poor business? When the public begins to distrust; this distrust arises in one's own family when the clerks discover loose methods in dealing with the public—the stepping stone that leads to the stumbling block. A fire runs faster over dry grass than the swiftest animal, and everything perishes in its track. We watch, try and systematize and throw out no funny business as bait for trade. Trade largely increasing in the dress goods department. All wools 50c, 60c, 65c, 75c, 85c, 90c, \$1. Samples and good treatment. Plenty of goods shown and money refunded where purchasers are dissatisfied—one of the reasons for our large increase. Silks and velvets, silks for ruffles and puffs, velvets for trimmings and fixings. You see the crowds here—they are growing in number. It is smooth sailing now. The trade should grow faster than ever. It will.

**THE ADVERTISING** of this house will vary more in the future than in the past. The newspapers claim to print all the news. When they have more news than paper they add more paper, or, in other words, put in a supplement. Our advertising will be on the same plan. During the busy season we need more space. In the dull season it is like a preacher talking to empty seats—no one to talk to and no enthusiasm invoked. If we need a full page we take it; if we need a few lines we take only what is needed. Yet almost every day for the next year we will remind you of the business of this house. Your attention will be called to the advantages offered. During the busy season we throw down the gates, and will do the most extensive and persistent advertising ever put forth in this city. It will win. All over the United States the most successful business men are the most successful advertisers.

**LACES.** The demand is on the increase. Five and seven widths in Flouncings to match from 2 $\frac{1}{2}$  to 12 inches wide, made on a light net with a heavy showy edge; they harmonize with the new style dresses and are being very largely used on cotton and silk. The prices are within your reach, 10c to a dollar a yard. Other laces with four widths of flouncings. Laces will have a big run as soon as the warm weather settles down to business.

**NAPKINS** that will wear. Good, honest, German-made napkins; neat patterns, well developed by close weaving and extra good twisting of the threads; bleached to perfection; good size; free from dressing; every thread made round and even; \$2.50 a dozen. There are cheaper napkins, but none so good for wear, and this is what you should consider in buying napkins.

**WINDSOR TIES**—May sellers, 25c and 50c; probably the largest assortment you ever saw. Leather Belts, May sellers, 25c, 50c, 75c, \$1.00. Pocketbooks and Purses, 25c, 50c, 75c, \$1.00. Kid Gloves, 1000 pairs, 75c a pair. Empire Skirts, made out of Black Satin. The pattern calls for 15 yards of goods. We make them on our own premises and sell them for \$2.50 each—new, the only place you will find them; cut from a Butterick pattern, and sold for less than you can buy the cloth and trimmings for. We have an object in view. Buy an Empire Skirt; they are new. Fine Black Satin Skirt, our own make, \$1.25. Made full to correspond with the new style of dresses.

**WE RECOMMEND** Royal Worcester Corsets. We can afford to recommend them, they have the merit, they are the best fitting, they are the best in every way for the price asked. Dressmakers study their own interests and recommend the Royal Worcester; they can fit better over a Royal Worcester than any other make; they are form-fitting. The prices are within your reach, \$1.00 and upward. Don't be prejudiced, but try a Royal Worcester. If you don't like the fit bring it back and get your money. Don't go upon the principle that a corset is a corset. A finer form can be had with a Royal Worcester than with any other corset.

**BIGGER** sales in Dress Goods; all the emerald hues in our Dress Goods Department. You know by this time that greens are stylish. We gave you a hint early in the spring to this effect. All-wool Dress Goods, 36 to 40 inches wide, 50c a yard, plain and fancy styles, greens among them. All-wool Dress Goods in larger assortment, plain and fancy styles, 75c a yard. More greens at this price. Still larger and better lines at a dollar a yard. Dress goods trade doubling over a year ago—samples for the asking.

**FIFTY-CENT** Dress Goods. All-wool fancy Scotch mixtures, one hundred or more styles, 36 to 42 inches wide, the best qualities we ever carried at the price. This class of extra wearing goods first gave us the big increase in the dress goods trade, and it has shown a steady upward turn since the commencement. The dress goods trade is growing more rapidly now than ever before. Why should we neglect the 50c line? On the other hand we have increased it. The best in the start and better now than then. Fifty-cent all-wools, plain and fancy, some equal to dollar grades elsewhere.

**ARE** you interested in Cape materials? We carry the largest assortment. Monday we cut and baste capes free; Monday only. When we cut them they will fit you and hang right—2 $\frac{1}{2}$  to 3 yards makes a cape. All-wool Cape Materials, \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50. Tans, blues, greens, reds, black, white, olive, heliotrope, a few shades we carry; new shades of green.

**MILLINERY** Week. Lower prices on Millinery this week. New Millinery this week. Leghorn Hats, 25c and 50c. None sold to dealers. Plenty of Colored Velvet Ribbons; they are scarce, but we have them. New flowers, new Roses, everybody wants them. Fine trimming with moderate prices. Our Millinery Department is a success, largely owing to the reasonable prices and fine styles.

**DO** you think for a moment we would throw out all other makes of corsets for the Royal Worcester if we had the least doubt about their fit? Repeatedly we have dressmakers say they would prefer to fit a dress over a Royal Worcester than any other make. They know what a good-fitting corset means. A good dressmaker will make a good-fitting dress over a good-fitting corset. A dressmaker who can't make a good-fitting dress over a Royal Worcester has no business to make dresses. Ladies cannot afford to economize on an inferior corset. False economy stares the public in the face by a poor figure. The best dressmakers in the world dictate to their patrons the kind of corset they should wear, and will refuse to fit a dress over any other. The corset has everything to do with the fit of a dress. Royal Worcester Corsets \$1, \$1.25, \$1.50, \$1.75, \$2, \$2.50, \$3, \$3.50, \$4, \$4.50, \$5, \$6, \$8; long, medium and short waists; extra long and extra short; you make no mistake when you buy a Royal Worcester.

→ If you want good treatment, if you want to be waited upon by pleasant salespeople, if you want to be treated in a sensible manner, we cordially invite you to come and see us. This is attention paid you, if you want a sample, if you want to be treated in a sensible manner, we cordially invite you to come and see us. This is

**BUSINESS.****FINANCIAL AND COMMERCIAL.**

OFFICES OF THE TIMES,  
Los Angeles, May 6, 1893.  
The World's Fair season for California fruits opened yesterday. The first consignment of California cherries sold at \$10 per box, or about \$1 a pound.

A New York dispatch says: "The bank statement shows that the reserve has increased \$897,000, and the deposits, \$1,650,000. The banks now hold \$12,833,000 in excess of the legal requirement."

John P. Jackson, Assistant Treasurer of the United States at San Francisco, reports cash on hand in the Sub-treasury at close of business on April 30, as follows:

United States notes.....	\$ 60,799.00
Revenue notes, 1890.....	9,725.00

Standard dollars shipped in April..... \$56,250.00  
Fractional coins shipped in April..... 45,400.00

New York Stocks.

NEW YORK, May 6.—After one of the most exciting weeks in the history of the Stock Exchange, Wall street today had a much-longed-for breathing spell. The absence of failures, record gains in all stocks, and the recent shrinkage in prices will shortly resume, and a favorable bank statement, all combined to restore confidence, and led to a material recovery in prices. Movements were by no means regular, but there was nothing strange about the market. The public and individuals were disposed to take advantage of rallies in the market to place their affairs in an easier position. Hence every time a substantial recovery occurred it was a mania for stock came out and real actions ensued. The week's comings and goings were excited, however, and dealings were not much above the average. Industrial stocks showed the largest net gains today.

American Tobacco advanced 12; Sugar, 2%; Sugar preferred, 5%; Cotton Oil preferred, 2%; Chicago Gas, 1%; Consolidated Gas, 2%; General Electric, 2½%; Cordage preferred, 3%; National Linseed Oil, 2%; and United States Rubber, 5% points.

Another railroads Jersey Central, Pittsburg and Western, New York Central, Evansville and Terre Haute, and Great Northern preferred advanced 2½ points. Active stocks like Paul, Rock Island, Union Pacific, Missouri Pacific, Lake Shore and Michigan, and Nashville closed ¾ to 1% points lower than on Friday. The market closed firm.

Government bonds closed firm.

NEW YORK, May 6.—MONEY—Our call, at 3%@ per cent; closed offered at 3% per cent.

FOREIGN MERCANTILE PAPER—33@ per cent.

STERLING EXCHANGE—Was steady; bankers' 60-day bills, 4.84%@4.85%; demand, 4.86%@4.87%.

Take promiscuously a dozen items of each of our numerous departments, compare them with a like number of articles from any other house and it will confirm our claim that of being the cheapest house in the State without ever sacrificing quality for price.

## Glimpses at Our Men's and Young Men's CLOTHING DEPT.

### SUITS

AT

**\$7.45**

We bought these elegant garments at a very low price, much under value, and we are dividing the advantage thus gained with you. They are worth no less than \$10, and if you don't find them so you can have one for nothing.

### SUITS

AT

**\$10.00**

We respectfully invite that individual after posting himself on the boasted bargains of other houses, to examine the superb styles we are showing at this price. Nothing approaching them can be bought elsewhere for 25 per cent. more money.

### SUITS

AT

**\$12.50**

We show over 2000 suits at this price and guarantee them equal to any \$15 or \$16 suit sold by competition in this State. Style: Single and double-breasted Sacks and 3 and 4-button Cutaways. Fabrics: Elegant Worsted, black and blue Serges, Cheviots, Cashmeres and neat silk mixtures.

### SUITS

AT

**\$15.00**

\$18, \$20 and \$25.

Are our magnificent line of tailored triumphs. The perfection of fit and fashion has been reached in these superb suits. It is a physical impossibility to make better suits than our best ones—tailors' \$40 and \$50 suits are no better in any sense. Every modern style and good quality are found in these suits. They are positively at the top notch and at the pit of popularity in price.

Beginning  
TOMORROW,  
Monday

And for the Entire Week we come before you with the greatest aggregation of

# REAL... BARGAINS

—Ever Offered in This State

We Are the Originators  
and Maintainers of Low Prices...

Our goods are marked when first placed on sale at a slight advance of cost, as only a house can afford that does the volume of trade we do. In conspicuous instances other houses occasionally meet our prices as leaders, but it is like the unwilling workman who will only do his task while under the vigilant eye of the overseer—it is a forced exaction, not a spontaneous tribute.

## Glimpses at Our BOYS' DEPT.

Take patent Safety Elevator or Grand Staircase to the Most Elegant Boys' Department in the State.

## THE PEN OF INGALLS

## A Slashing Criticism of Pothouse Politicians.

## The Men Who Glass Politics With Poker and Pugilism.

## Public Men Not More Unclean Than Their Constituencies.

*"Mr. Cleveland, Who Has Been One of the Most Persistent and Inveterate Office-seekers of the Age, Takes Frequent Occasions to Encourage Office-seeking"—But Few Rich Men in the Senate—Young Men Should Bear in Mind That They Do Not Need Money in Order to Succeed in Politics.*

Specified Contributed to The Times.

**N**ON A representative democracy like ours, where the people are sovereign and the will of the majority is supreme, every citizen should be a politician, not necessarily in the selfish sense of being an aspirant for office, but in the broader and more patriotic view of taking an active and intelligent interest in public affairs.

There is no dynasty, no reigning family, no prerogative not inherited by governing class, no inherent privilege or power. The only national government is the President and the Congress, chosen periodically by a majority of the people, and the judiciary nominated by the Executive and confirmed by the Senate. These are the agents and ministers delegated to carry into effect the purposes and desires of the inhabitants of the United States in their relations with each other and with foreign nations. The Czar, the Emperor and the Queen represent an authority above and independent of the people over whom they rule. But there is no such domination or supremacy here. Mr. Cleveland is not a ruler, but a servant. Representatives and Senators in Congress are delegates to act for constituents, to whom they are responsible. The vague idea that there is a "government," an independent political entity, to which the people can appeal for relief from the evils of society; "estate" that can take control of state business and individual fortunes, proceeds from an entire misapprehension of our system.

The "nationalization of all industries," stripped of its emblematic means nearly the substitution of the tyranny of a mob for the tyranny of a monarch; the taking by force from those who have, and giving to those who have not; the obliteration of the organic distinctions between men; the confounding of the moral and intellectual limitations of the race; the attempt by laws of Congress to abrogate and repeal the laws of God.

We hear much recent denunciation of bad government in the United States; loud declaiming against corruption in Congress, municipal boodleism, ring rule, legislation for corporations, monopolies, plutocrats and millionaires. Much of this class is manufactured by ignorant and dishonest demagogues, and is both sinister and insincere, but if it were true in terms the appropriate reply is that the people of this country are "supreme," and that they have just as good government as they deserve to have. If taxes are excessive, if revenues are wasted, if fools and knaves occupy high places, the people themselves are to blame. If a legislator sells his vote, the constituency that elected him is primarily at fault. If a mute and stupid millionaire sits dumbly in the Senate, speeches except at roll-call, and almost invariably then, finding in the public service the occasion for brutal indulgence, vulgar ostentation, the State that sends him in response is to be degraded. He represents the deliberate judgment and preference of a majority of its citizens or he would not be there. No man is rich enough to break into the Senate of his own motion. He goes there as the voluntary choice and selection of the State with its certificate of eligibility. His credentials are a waiver of complaint, reproof and reproach at his defects or de-licencies.

In every community there are more intelligent, industrious, upright and patriotic men than rogues and scoundrels. If there were not society would disintegrate. It would perish by its own infirmities. When the honest, upright minorities upon any pretext neglect their political obligations, omit to attend the primaries, the nominating conventions and the polls, they abdicate their sovereignty. They wear the crown and hold the scepter, and if they choose to lay down it is puerile to whine about bad government. Our political system is not automatic. It will not run itself. Somebody must exert its functions, and if good men will not then bad men may. The overthrow of Tweed and his brigands in New York show what a community can do when it will. The feeble lamentations in the metropolis now about municipal misrule, filthy streets and fished revenues disparage the capacity of its inhabitants for self-government. If such a condition is inevitable, then a cleanly, strong capable and honest monarchy or despotism would be better. If the people do not value their freedom enough to exercise its prerogatives and discharge its duties, they ought to be, and sooner or later they will be, subjects and slaves.

The corollary of suffrage is office, executive, legislative and judicial. One is the complement of the other. Both are indispensable components of the system. As there are electors, so also must there be magistrates, legislators and judges. It is as much the duty of the citizen to hold office as to cast the ballot.

The same class of citizens who neglect their primary political obligations, and are fatigued with liberty, sneer and scoff at "office-seekers," as if the desire to enter the public service were dishonorable, an offense involving turpitude and moral degradation. The pseudo-reformers, who have a contempt for popular self-government, and at heart are monarchists, stigmatize all aspirants for public employment, except themselves, as apoliticians and plac-hunters. Mr. Cleveland, who has been one of the most persistent and inveter-

ates office-seekers of the age—District Attorney, Sheriff, Mayor, Governor and three times nominated for the Presidency—takes frequent occasion to encourage office-seeking, apparently forgetting that the ambition to be postmaster is as respectable and as laudable as the ambition to be President, and that to the community he deserves a postmaster is quite as important and fully as necessary as a President. The only difference is in degrees, and not in kind.

That political activity is honorable as well as essential to the perpetuation of democracies must be admitted. Whether politics, as a vocation, is desirable is quite another question. It depends. Probably it would be just to say that existing conditions of public life are not favorable to happiness. Possibly the obstacles are increasing rather than diminishing. Conditions are more exacting. Competition is more formidable, and money is becoming a factor in the problem of success that cannot be ignored. This does not necessarily imply personal corruption. The legitimate expenses of political campaigns are large for advertising, traveling, literature, rooms, music, compensation for speakers, banners, scrutiny of poll-lists, preliminary canvases of voters, and time spent in bringing out infirm and indifferent voters upon election day. But as these are wholly or in part borne by subscriptions and assessment, financial considerations need not exclude the poorest candidate from political preferment.

One of the favorite culprimes of our political incendiaries is that which stigmatizes the public service as indecently except to the rich. There are too many who occupy exalted stations merely because they have money, but a very large per cent, much more than a majority, of those in public employment have no income except their salaries. The pay of Senators and Representatives seems meager compared with the incomes of successful lawyers, railroad presidents and merchants, but it is ample for decent support and maintenance, and, in most instances, exceeds any income previously earned in private pursuits. The bulk of our legislators and magistrates are men of fair, ordinary, average, every-day capacity, who would be content with the revenues of a country lawyer in full practice, or the profits of a druggist or the tradesman in a county town. Great men are as rare in politics as they are elsewhere, and they are no more needed there than elsewhere. The main part of government is business, and requires the same facilities and methods as a great manufacturing or commercial enterprise.

But the scope is broader and the opportunity more tempting. Government affords concern every citizen, and the legislator with noble and forcible ideas, which he expresses in original and striking language, has an assured audience of as many millions as there are voters in the Republic. The poet, the teacher, the novelist, the clergyman address narrow constituencies, even when most popular, but a brilliant speech in Congress is an effective retort, a dramatic incident, a remarkable detail in the broadcast table, the talk of the day from ocean to ocean. To the ambitious and aspiring this is one secret of the fascination of public life—the consciousness of participating in great events which are of transcendent interest to mankind. There is no theater from which the voice of the actor penetrates so far, or where the response is so instantaneous from unknown multitudes, as Congress or the "stamp."

It might, perhaps, be of greater advantage in some directions if our institutions permitted the preparation of men for legislation, political economy, constitutional and international law, as they are instructed and trained for service in the army and navy and for the professions. But this is not practicable, and so long as the system of party government continues politics must be an episode rather than a pursuit. Occasionally, a thoughtful, conservative community, recognizing the value of experience, training and discipline, resists the impulse for rotation in office, and retains its Senators and Representatives as long as they have the capacity or the inclination to serve. But the rule is otherwise, and the practical work of Congress and the departments falls into fewer and fewer hands as the multitude of inexperienced and insufficient participants increases and the interests to be considered become more important with our growth in wealth and numbers. It would, perhaps, be within bounds to say that the speaker and the Representative in each Congress have been the reliable architects and builders of our legislative fabric since the war. In the Senate, for obvious reasons, the proportion of potential participants is greater, but even here it is less than a majority.

Marked and notable success is, therefore, no more to be taken into account in politics than in any other occupation. Those who greatly succeed in business, at the bar, in the pulpit, in speculation, are the exceptions. Many are called, but few chosen.

Public service being a duty or obligation which the State demands of its citizens, since it can be performed by no one else, should be honorable and desirable. It is like service on the jury or in the army now in time of war. Without the State would perish. Its functions could not be exercised, and it is impossible to imagine instead of being serious and defined like provincial political careers are so random, hector-skewer and uncertain that they seem in common estimation to combine the dross bombast of the stage, the fever of the gambling-table and the desperate hazard of battle. Grave, calm and tranquil natures that love method and the orderly sequences of life, preferring the steady gains of traffic to the glittering chances of the lottery, place politics in the same catalogue with poker and pugilism, so that to describe a man as a politician is disparaging to many, and implies taint, disreput and stain. The implication is both unfortunate and unjust. Instead of being a stigma, it should be an ornament and decoration. The degradation of politics is impossible without the degradation of the people.

A side from the exalted considerations of pride and patriotism there is nothing that more intimately concerns the self-same personal interests of the American citizen than good government. Wages, prices, taxes, income, profits, education, commerce, manufactures, agriculture, money, comfort, prosperity and the security of life, property and liberty are all affected by politics. They err who affirm that it is only a question of who shall have the offices, and that makes no difference which succeeds. Some of the recent revolutions in our politics have depreciated the value of every acre of land in great States, impaired the

capacity of every debtor to borrow or to pay, and inflicted a shock upon the credit of rich and solvent communities, from which for half a generation they cannot recover.

A most distinguished and eloquent citizen of New York recently, in a public interview, advised young men to take no active interest in politics till by business or professional activity they had secured competence or fortune, so as to be independent of party vicissitudes. This was well meant, but no instruction could be more deleterious to Democratic institutions. To confine political functions to the rich would develop the most detestable of all forms of despotism. In practice it would have deprived our history of many of its most luminous and inspiring examples. Undoubtedly, to proud, ambitious and sensitive spirits there is something of humbling in accepting the responsibility that cannot be returned. Social entertainments, splendid equipages and apparel, luxurious palaces and lordly expenditures have a power and charm that can neither be denied nor ignored. Added to high rank and station they give their possessors an importance and influence far greater than that to which he might be entitled by his intellectual gifts or attainments. There is no modern magic so subtle as that of wealth. To multitudes there is no acquisition so alluring as a great bank account, no capacity so dazzling as that of drawing a check for a million. But our greatest political leaders have not been favored by birth or fortune. Washington was the richest man of his time, but the situation had changed, and political millionaires are unknown. They are suspected. Their attitude is apologetic. They are on the defensive.

The ideal place for one who has aptitude for public service is the Senate of the United States. The House offers wider scope for leadership, broader opportunity for power and fame. In the Senate there are no leaders, and rivalry and emulation seldom degenerate into strife for supremacy. Representing States rather than constituencies its members are equals, and applause is conceded to excellence irrespective of partisanship. Courtesy is the rule of its culture, and dignity characterizes its debates. Its records have been seldom defaced by personal vindictive or alteration. Length of term exempts its action from the casual aberrations of popular error and passion. The limitation of numbers affords opportunity for deliberate discussion of principles of government and administration. Its judgment of recruits is affable but pitiless. Scrutiny is relentless. The new-comer is gauged, weighed, estimated and assigned to his own place. From the verdict there is neither appeal for clemency.

Lincoln, Garfield, Morton of Indiana, Henry Wilson and many other great popular tribunes entered at the straight gate. Had they followed the precepts inculcated by the writer mentioned and advised for forming a political life the author of the present article would have been written on the roll of common men. Recent annals offer no more striking refutation of this error than that afforded by the life and services of Samuel Jackson Randall of Pennsylvania. This very able and eminent man, whose extraordinary qualities and achievements should have given him more conspicuous renown, has lately been recalled to public recollection by the final settlement of his estate, from which it appeared that he died possessed of less than \$1000 after thirty years spent in municipal, State and national legislation. His poverty was not especially creditable to him, for there is no good reason why a Representative in Congress should not receive a pension, but, in American politics money does stink, and the people hold their noses when the bribe-giver or the bribe-taker passes by.

LOS ANGELES, SUNDAY, MAY 7, 1893.

## GOING TO THE FAIR?

If You are, These Facts May Interest You.

The Money Side of a Visit to the Columbian Show.

Railroad Fares, Board, Lodging, Fees, Fakirs and Extras.

Perhaps You May Like to Go in a Tourist Party With a Guide-Boats and Trains in Chicago.

Special Correspondence of The Times.

HICAGO, May 3.—

—Perhaps you have put off indefinitely the question as to whether or not you are going to the fair. Probably most people have. But everybody is in a frame of mind to receive information that may help to solve the question when the question is taken up. Even those who have conservatively said that they scarcely expect to go, or that they won't go, do not despise a glimpse at hotel or boarding-house rates and fares in general.

Undoubtedly as many people are overestimating as are underestimating the cost of visiting the fair. If you cannot go for a song, it is also true that it will cost considerably less than a fortune.

Well, it depends a good deal on what part of the country you are living in, for railroad fares are the big item to anybody living far from the Windy City. There has been much sanguine talk as to fares—as to rates, excursions, specialties, etc.—but it must be remembered that these expectations are generally too sanguine. Railways have been suddenly defaced by personal vindictive or alteration. Length of term exempts its action from the casual aberrations of popular error and passion. The limitation of numbers affords opportunity for deliberate discussion of principles of government and administration. Its judgment of recruits is affable but pitiless. Scrutiny is relentless. The new-comer is gauged, weighed, estimated and assigned to his own place. From the verdict there is neither appeal for clemency.

The evenings—and there will be plenty to see this summer, including one underground, museums and cycloramas, not to mention Libby Prison, in full blast—will be as well as nearer the heart of the city as the day. The great lines have hardly been very busy, and it is estimated that many of them will have all they can carry in a few weeks, even should the rates remain unchanged. There will, however, be reductions in rates everywhere, not great reductions, but modifications that will reduce the traveling expense of visiting the fair about one-third. Of

## A STORM OF IRON HAIL

THE ADVANCE ON FORT DONELSON  
BY FOOTE'S GUNBOATS.

ONE WHO WAS IN THE PILOTHOUSE OF THE FOREMOST DESCRIBES HOW THE UNION FORCES WERE MET BY THE DEADLY GUNS FROM THE FORT—THE DISABLED ST. LOUIS.

AS I REMEMBER COMMODORE—AFTERWARDS ADMIRAL—FOOTE IN THE EARLY DAYS OF THE MISSISSIPPI FLOTILLA, HE WAS A MAN OF NEARLY 60, BELOW THE MEDIUM STATURE, WITH GRAY HAIR AND WHISKERS AND A PAIR OF PIERCING BUT KINDLY BLUE EYES.

I HAD BEEN TO CAIRO BY THE CINCINNATI GAZETTE TO ACT AS CORRESPONDENT FROM THAT QUARTER. THE GUNBOATS HAD JUST RETURNED FROM THE BLOODY VICTORY OF FORT HENRY AND WERE FITTING OUT FOR WHAT AFTERWARD PROVED TO BE FOR THEM THE VERY DISASTROUS BATTLE OF FORT DONELSON. THE COMMODORE HAPPENED TO BE CALLING JUST THEN FROM A RHEUMATIC HAND, AND HIS INFIRMITY BECAME MY OPPORTUNITY FOR THROUGH A FRIEND I OFFERED MY SERVICES AS A VOLUNTEER PRIVATE SECRETARY, WHICH WERE PROMPTLY ACCEPTED, AND THUS I OBTAINED A BERTH ON THE FLAGSHIP OF THE SQUADRON, THE ST. LOUIS.

THE FLEET CONSISTED OF FOUR IRONCLADS—THE ST. LOUIS, THE LOUISVILLE, THE PITTSBURG AND THE CARONDELET, AND TWO WOODEN VESSELS—THE TYLER AND CONNECTICUT. THE GUNBOATS WERE OF A VERY SLOW MOTION. THEY WERE PROPELLED BY LARGE PADLE WHEELS LOCATED AMIDSHIPS, WHICH SEEMED TO HAVE ALL OF IT. ONE COULD DO SO MUCH WITH THEM AS THE MICHIGAN AND AFTERWARD THE CONNECTICUT, IN A BEND UPON THE RIGHT BANK OF WHICH, AS WE ASCENDED, FORT DONELSON WAS LOCATED. THE IRONCLADS WERE BUILT OF VERY HEAVY OAK PLATED WITH WROUGHT IRON 1½ TO 2 INCHES THICK AND SUPPOSED TO BE PROOF AGAINST THE HEAVIEST ARTILLERY.

THE CONDITION OF THE SHIPS AND THEIR CREWS AFTER THE BATTLE SHOWED THAT THE LATTER POSITION WAS INCORRECT. THE PILOTHOUSE WAS ON THE UPPER DECK, WELL FORWARD. IT WAS CONICAL IN SHAPE AND HAD FOLD FOUR MEN STANDING UP AND TWO OR THREE MORE RECLINING ON COATS IN THE ANGLES FOR CONTACT WITH THE DECK. IT WAS ENCLOSED BY A LADDER FROM BELOW, REACHING FROM THE GUN DECK. IT WAS OF COURSE OF COURSE IRON AND WAS INTENDED TO HAVE MORE RESISTING POWER THAN ANY OTHER PART OF THE SHIP, BUT THOSE WHO OCCUPIED IT DURING THE ENGAGEMENT DISCOVERED THAT THIS WAS A MISTAKE.

I CALLED AT THE COMMODORE'S CABIN LATE ON THE NIGHT OF THE 13TH TO ASK IF MY SERVICES AS AN AMANUENSIS WERE NEEDED. "NO," THE COMMODORE SAID, WITH MUCH CHEERFULNESS; "EVERYTHING IS READY NOW. BEFORE I GO TO BED I WILL PRAY FOR VICTORY, WHICH I THINK WE SHALL WIN, OR FOR THE NEXT BEST THING TO VICTORY, WHICH IS GRACE TO BEAR DEATH."

EVERYTHING WAS IN READINESS ON THE MORNING OF FEB. 14, AND THE COMMODORE SIGNALLED THE SHIPS TO MOVE IN THE ORDER PREVIOUSLY ARRANGED, WHICH WAS FOR THE ST. LOUIS, BEING THE FLAGSHIP, LED THE PROCESSION. I ACCOMPANIED THE COMMODORE FROM HIS CABIN TO THE PILOTHOUSE, WHERE WE BOTH REMAINED UNTIL AFTER THE BATTLE WAS OVER. WHEN WE REACHED THE PILOTHOUSE, THE COMMODORE SAID IT WAS ONE OF HIS "SICK HEADACHE DAYS," AND IMMEDIATELY THREW HIMSELF ON A COAT WHICH FILLED ONE OF THE ANGLES OF THE SMALL APARTMENT, DIRECTING ME AT THE SAME TIME TO STAND AT ONE OF THE LITTLE IRON WINDOWS AND REPORT TO HIM HOW WE WERE PROGRESSING.

I HAD A GOOD FIELDGLASS, WHICH I BROUGHT TO A FOCUS ON THE FORT. VERY SOON THERE WAS A PLATE OF SKY, AND THE KNOCKS FOR ADMISSION WERE DETERMINED SOON AFTER.

THE COMMODORE, STILL LYING ON HIS COAT, UNABLE TO SEE WHAT WAS GOING ON AHEAD, AS THE TWO LITTLE WINDOW WERE OCCUPIED ONE BY THE PILOT ON DUTY AND THE OTHER BY MYSELF AS THE COMMODORE'S LOOKOUT, KEPT ASKING FOR MORE STEAM AND WAS ONLY HALF Satisfied TOLD FROM BELOW THAT THE SHIP COULD NOT CARRY ANOTHER POUND OF STEAM WITHOUT EXPLOSION.

ALL THIS TIME THE ST. LOUIS HAD BEEN MOVING TOWARD THE FORT AT FULL SPEED. "WE ARE GETTING AWFULLY CLOSE, COMMODORE. THROUGH THIS GLASS I CAN ALMOST PUT MY HAND ON THE FELLOWS AT THE GUNS IN THE FORT." "THAT'S RIGHT," SAID THE COMMODORE IN A VOICE WITHOUT THE SLIGHTEST EMOTION. "PUT ON A LITTLE MORE STEAM, MR. PILOT, AND GET AS CLOSE AS YOU CAN." AS BETWEEN THE FORT AND THE FLEET, IT WAS NOW A MIGHTY HOT FIGHT. FROM WITHIN THE PILOTHOUSE WE COULD HEAR THE GREAT IRON BALLS IMBEDDING THEMSELVES IN THE ARMOR WITH A SPLASH AND A SPLINTERS FLYING. THE COMMODORE, TOO, WAS BADLY WOUNDED IN THE FORT, AND DETERMINED SOMETHING.

THE COMMODORE, STILL LYING ON HIS COAT, UNABLE TO SEE WHAT WAS GOING ON AHEAD, AS THE TWO LITTLE WINDOW WERE OCCUPIED ONE BY THE PILOT ON DUTY AND THE OTHER BY MYSELF AS THE COMMODORE'S LOOKOUT, KEPT ASKING FOR MORE STEAM AND WAS ONLY HALF SATISFIED TOLD FROM BELOW THAT THE SHIP COULD NOT CARRY ANOTHER POUND OF STEAM WITHOUT EXPLOSION.

WE WERE NOW WITHIN 200 YARDS OF THE FORT, AND THE AIR WAS FULL OF THE IRON HAIL OF ALL THE GUNS ON BOTH SIDES. ONE COULD ALMOST SEE THE BIG PROJECTILES AS THEY CROSSED EACH OTHER'S PATH GOING IN OPPOSITE DIRECTIONS.

WHAT HAD BEEN LONG FEARED AND EXPECTED CAME AT LAST. A SHOT FROM THE BEST OF THE LARGEST RIFLED PISTOLS IN THE FORT—A GUN THAT HAD BEEN TRAINED ON OUR PILOTHOUSE SINCE THE OPENING OF THE BATTLE—STRUCK OUR ARMORED PLATING AT RIGHT ANGLES AND CAME CRASHING THROUGH THE IRON AND THE OAK AS THROUGH A PIECE OF PASTEBOARD. IT MUST HAVE EXPLODED EITHER IN COMING THROUGH OR IMMEDIATELY ON ENTERING THE PILOTHOUSE; AT ANY RATE, WE PICKED UP A FULL BUSHEL OF IRON FRAGMENTS FROM THE FLOOR OF THE PILOTHOUSE THAT NIGHT. THE PILOT, WHO WAS AT THE WHEEL AT THE TIME, A BRAVE FELLOW NAMED REILLY OF CINCINNATI, WAS STRUCK ON THE THIGH AND BLEED TO DEATH IN AN HOUR; THE COMMODORE WAS BADLY AND PAINFULLY WOUNDED ON THE LEG AND WAS CONFINED DURING THE REMAINDER OF HIS LIFE; THREE OTHERS WERE HURT IN VARIOUS WAYS; ONE WAS THE ONLY ONE OF SIX WHO ENTIRELY ESCAPED. THE STEERING WHEEL WAS BATTERED INTO MATCH TIMBERS AND ALL THE APPARATUS FOR CONTROLLING THE VESSEL WAS UtTERLY DESTROYED.

EVERYTHING WAS IN CHAOS INSIDE OF OUR SHATTERED CITADEL, BUT THE COMMODORE, SOLEMNLY WOUNDED THOUGH HE WAS, HAD SUFFICIENT PRESENCE OF MIND TO ORDER THE STEAM SHUT OFF, AS THE VESSEL WAS STILL MOVING TOWARD THE FORT WITHOUT PILOT OR RUDDER AND THE FORT WAS PLAYING UPON HER WITH TERRIBLE EFFECT. WHAT SAVED US ALL FROM DEATH OR CAPTURE WAS THE FACT THAT THE FIGHTING WAS SO CLOSELY GUARDED THAT THE DISABLED WERE SOON DRIFTED OUT OF RANGE. HAD WE BEEN FIGHTING DOWN STREAM WE SHOULD HAVE DRIFTED INTO THE FORT UNDER AN AWFUL FIRE AND TO INEVITABLE DESTRUCTION. THE OTHER VESSELS OF THE FLEET WERE ALL BADLY DAMAGED, BUT NONE SO BADLY AS THE ST. LOUIS.—MACK IN ST. LOUIS GLOBE-DEMOCRAT.

BLAINE ON GLADSTONE. SPEAKING OF MR. GLADSTONE, MR. BLAINE ONCE SAID: "HE IS UNDOUBTLY A GREAT MAN, BUT HE HAS VERY BAD MANNERS. ALL CONVERSATIONS WITH HIM MUST BE ONE-SIDED, AND HE INSISTS UPON DOING ALL THE TALKING. I MET HIM HALF A DOZEN TIMES. UPON ONE OCCASION I WAS WITH HIM TWO HOURS, AND I DO NOT THINK I SAID A DOZEN WORDS IN ALL THAT TIME, AND YET I AM TOLD THAT I AM SOMETHING OF A TALKER MYSELF."

LADY GORDON IN HER SEARCH THROUGH ENGLISH LIBRARIES FOR BOOKS WRITTEN BY WOMEN HAS DISCOVERED A PAMPHLET ON RIGHTS OF WOMEN PUBLISHED IN 1868 BY MARY ASSELL. ITS TITLE IS "ADVICE TO LADIES."

THE TRUE TEST OF GREATNESS. RICHELIEU SAID THAT IN THE HANDS OF A MAN ENTIRELY GREAT THE PEN IS MIGHTIER THAN THE SWORD. IT MAY BE AS TRULY SAID THAT FOR A MAN ENTIRELY GREAT HE MUST ALSO HAVE THE QUALITIES OF TRUE GOODNESS.—NORFOLK LAND MARK.

## AN ETRUSCAN BOOK.

AN EGYPTIAN WRAPPED IN THE FOLDS OF A VERY OLD MANUSCRIPT.

The Etruscan alphabet can be read with as much ease as the alphabet of Rome; the words of a text are usually divided from one another by means of points, and yet the meaning of these words cannot be fixed. Like the geologist who comes to a "fault" in the strata he is examining as in Etruscan the philologist finds a linguistic "fault"—a language which refuses to be compared with any other that is known to him.

A discovery made by Professor Krall of Vienna has removed the first difficulty which stands in our way. It can no longer be said that it is impossible to decipher the Etruscan language because the materials for doing so are insufficient. Three-fourths of an ancient Etruscan book, written on linen, has been discovered, and discovered, moreover, in the most unlikely of places—the coffin of an Egyptian mummy.

The mummy was brought from Egypt some 40 years ago by an Austrian traveler and deposited after his death in the museum of Agram. When unrolled, it was found that the linen bands which were wrapped around it were covered with written characters.

The mummy was brought from Egypt some 40 years ago by an Austrian traveler and deposited after his death in the museum of Agram. When unrolled, it was found that the linen bands which were wrapped around it were covered with written characters.

Professor Krall's discovery was made at the beginning of 1891. Since then he has been occupied in transcribing the text, portions of which are difficult to read, and in determining the order in which the fragments should be arranged.

There is a certain professor in this city who lectures before a class of students on a subject extremely abstract and difficult to grasp, and a story is told of a situation in which he suddenly found himself one day while lecturing on one of the subjects above topics.

He had an inkling of the nature of the subject on the day in question, for at its beginning the professor faced but half a dozen students.

He adjusted his glasses, smiled his pleasant smile, and turning to his manuscript was soon revolving in the intricate and bewildering theories of his favorite subject.

Attention from the benches lasted but a short time. There was plenty of room to stretch, and stretch they did. In the course of half an hour every one of those six was either extended at full length or in a semicircular position.

If the professor had looked up, he would have counted but two heads; others were lost behind the high-backed benches. Everyone was quiet enough to indicate closest interest on the part of the students, and the mind of the professor was far away from mundane environments.

Suddenly from one of the benches there came a great, long, prolonged snore—Morpheus had laid hold of him. The half awake quintet suppressed their giggles the best they could. The professor dropped his glasses and eyed the two heads with a look of great surprise. He took in the situation, immediately, grasped his manuscript and strode out of the room. "And he never went there any more."

The course of lectures was completed.—Boston Globe.

THE PRISES OF SKELETONS.

DOMESTIC SKELETONS ARE GENERALLY THE WORK OF AMATEURS. JANITORS IN MEDICAL COLLEGES RESCUE BONES FROM THE DISSECTING ROOMS AND CURE AND ARTICULATE THEM. THEY FIND PURCHASERS AMONG THE STUDENTS, WHO ON THE COMPLETION OF THEIR STUDIES RESELL THE SKELETONS, IF HAPPILY THE MARKET IS NOT glutted. A SECONDHAND SKELETON MAY BE BOUGHT AT QUITE A PRICE.

THE CELEBRATED MAGNOLIA VINEYARD OF 480 ACRES IN ORCHARD, ALFALFA, MUSCAT AND MANGA VINES HAS BEEN SUBDIVIDED INTO 20-ACRE TRACTS, AND IS NOW OFFERED FOR SALE AT A GREAT SACRIFICE IN ORDER TO SETTLE UP AN ESTATE. THIS PROPERTY IS LOCATED EIGHT MILES WEST OF FRESNO CITY, ADJOINING THE GREAT FRUITLAND ESTATE, AND AT THE TERMINUS OF CHATEAU AVENUE, ONE OF THE MOST BEAUTIFUL DRIVES IN CALIFORNIA, AND ONE AND A HALF MILES FROM THE RAILROAD DEPOT AT ROLLINGO. THE LAND IS PERFECTLY LEVEL, ALL UNDER-IRRIGATION, WITH PERFECT WATER RIGHT RUNNING WITH THE LAND. THE SOIL IS A RICH RED LEAN AND FREE FROM ALKALI. THE ENTIRE PROPERTY IS FENCED WITH RABBIT-PROOF FENCE, AND THE STAND IS PERFECT. ONE 80-ACRE TRACT HAS A BAR FOR 40 HORSES, LARGE RANCH HOUSE, SHED, WINDMILL, TANK, BLACKSMITH SHOP AND OUT HOUSES. HOWE SCALE, 7000 TRAYS, 300 SWEAT BOXES, FARMING UTENSILS, ETC., WHICH GO WITH THIS 80-ACRE TRACT IF SOLD AS A WHOLE. THIS IS ONE OF THE MOST BEAUTIFUL VINEYARDS IN CALIFORNIA. IT IS CONNECTED BY TELEPHONE WITH THE GENERAL SYSTEM AT FRESNO, AND IS AT PRESENT RENTED FOR ONE-HALF OF THE CROP DELIVERED IN FRESNO, WITH THE PRIVILEGE TO CAUSE LEASE IN CASE OF SALE. IT WILL PAY \$100 PER ACRE NET UPON PROPER CULTIVATION, AND WE GUARANTEE \$50 PER ACRE NET FROM THE COMING CROP.

WHY A LECTURER STOPPED.

There are two methods of preserving the productions wrought in clay. One is to have them cast in plaster, and the other is to have them baked in the kiln, thus producing terra cotta. In order to insure the best results in the latter case, the clay must be free from impurities and the work built upon a single support which can be easily removed when the model is fired. Yellow, red or gray clay may be employed, producing respectively white, yellow and red terra cotta. Artists can procure the different clays in working condition from art dealers in art materials or direct from the pottery, while small packages of dry clay, containing a few pounds in each, are obtainable at almost any art store. Dry clay can be prepared for use by soaking it in water until it is of the right consistency to work readily in the fingers. In order to effect this well, the clay should be broken up in small pieces and when sufficiently moist kneaded well together until all lumpiness has entirely disappeared and the clay is sufficiently moist to be thoroughly pliable and yet not wet enough to be sticky and to adhere to the fingers.

Worth is not successful enough to warrant preservation, as it becomes brittle and the clay breaks again and again.

The clay is worked with the better and more pliable it becomes. The clay is kept moist by means of wet cloths laid over it, with preferably an outer covering of waterproof fabric. A little experience will soon teach a student just how to keep the clay in good condition. Usually the cloths will require wetting afresh once, perhaps twice, a day. This depends, however, upon the atmosphere in which it is kept.—Maude Hay-Wood in Ladies' Home Journal.

# BUY A VINEYARD!

## \$50.00 An Acre.

The celebrated Magnolia Vineyard of 480 acres in orchard, alfalfa, muscat and mangia vines has been subdivided into 20-acre tracts, and is now offered for sale at a great sacrifice in order to settle up an estate. This property is located eight miles west of Fresno city, adjoining the great Fruitland estate, and at the terminus of Chateau Avenue, one of the most beautiful drives in California, and one and a half miles from the railroad depot at Rollingo. The land is perfectly level, all under-irrigation, with perfect water right running with the land. The soil is a rich red lean and free from alkali. The entire property is fenced with rabbit-proof fence, and the stand is perfect. One 80-acre tract has a bar for 40 horses, large ranch house, shed, windmill, tank, blacksmith shop and out houses. Howe scale, 7000 trays, 300 sweat boxes, farming utensils, etc., which go with this 80-acre tract if sold as a whole. This is one of the most beautiful vineyards in California. It is connected by telephone with the general system at Fresno, and is at present rented for one-half of the crop delivered in Fresno, with the privilege to cause lease in case of sale. It will pay \$100 per acre net upon proper cultivation, and we guarantee \$50 per acre net from the coming crop.

WHY A LECTURER STOPPED.

There is a certain professor in this city who lectures before a class of students on a subject extremely abstract and difficult to grasp, and a story is told of a situation in which he suddenly found himself one day while lecturing on one of the subjects above topics.

He had an inkling of the nature of the subject on the day in question, for at its beginning the professor faced but half a dozen students.

He adjusted his glasses, smiled his pleasant smile, and turning to his manuscript was soon revolving in the intricate and bewildering theories of his favorite subject.

Attention from the benches lasted but a short time. There was plenty of room to stretch, and stretch they did. In the course of half an hour every one of those six was either extended at full length or in a semicircular position.

If the professor had looked up, he would have counted but two heads; others were lost behind the high-backed benches.

Everyone was quiet enough to indicate closest interest on the part of the students, and the mind of the professor was far away from mundane environments.

Suddenly from one of the benches there came a great, long, prolonged snore—Morpheus had laid hold of him. The half awake quintet suppressed their giggles the best they could. The professor dropped his glasses and eyed the two heads with a look of great surprise. He took in the situation, immediately, grasped his manuscript and strode out of the room. "And he never went there any more."

The course of lectures was completed.—Boston Globe.

BUTTERFLY.

THE FRIESES OF SKELETONS.

DOMESTIC SKELETONS ARE GENERALLY THE WORK OF AMATEURS. JANITORS IN MEDICAL COLLEGES RESCUE BONES FROM THE DISSECTING ROOMS AND CURE AND ARTICULATE THEM. THEY FIND PURCHASERS AMONG THE STUDENTS, WHO ON THE COMPLETION OF THEIR STUDIES RESELL THE SKELETONS, IF HAPPILY THE MARKET IS NOT glutted. A SECONDHAND SKELETON MAY BE BOUGHT AT QUITE A PRICE.

THE CELEBRATED MAGNOLIA VINEYARD OF 480 ACRES IN ORCHARD, ALFALFA, MUSCAT AND MANGA VINES HAS BEEN SUBDIVIDED INTO 20-ACRE TRACTS, AND IS NOW OFFERED FOR SALE AT A GREAT SACRIFICE IN ORDER TO SETTLE UP AN ESTATE. THIS PROPERTY IS LOCATED EIGHT MILES WEST OF FRESNO CITY, ADJOINING THE GREAT FRUITLAND ESTATE, AND AT THE TERMINUS OF CHATEAU AVENUE, ONE OF THE MOST BEAUTIFUL DRIVES IN CALIFORNIA, AND ONE AND A HALF MILES FROM THE RAILROAD DEPOT AT ROLLINGO. THE LAND IS PERFECTLY LEVEL, ALL UNDER-IRRIGATION, WITH PERFECT WATER RIGHT RUNNING WITH THE LAND. THE SOIL IS A RICH RED LEAN AND FREE FROM ALKALI. THE ENTIRE PROPERTY IS FENCED WITH RABBIT-PROOF FENCE, AND THE STAND IS PERFECT. ONE 80-ACRE TRACT HAS A BAR FOR 40 HORSES, LARGE RANCH HOUSE, SHED, WINDMILL, TANK, BLACKSMITH SHOP AND OUT HOUSES. HOWE SCALE, 7000 TRAYS, 300 SWEAT BOXES, FARMING UTENSILS, ETC., WHICH GO WITH THIS 80-ACRE TRACT IF SOLD AS A WHOLE. THIS IS ONE OF THE MOST BEAUTIFUL VINEYARDS IN CALIFORNIA. IT IS CONNECTED BY TELEPHONE WITH THE GENERAL SYSTEM AT FRESNO, AND IS AT PRESENT RENTED FOR ONE-HALF OF THE CROP DELIVERED IN FRESNO, WITH THE PRIVILEGE TO CAUSE LEASE IN CASE OF SALE. IT WILL PAY \$100 PER ACRE NET UPON PROPER CULTIVATION, AND WE GUARANTEE \$50 PER ACRE NET FROM THE COMING CROP.

WHY A LECTURER STOPPED.

There are two methods of preserving the productions wrought in clay. One is to have them cast in plaster, and the other is to have them baked in the kiln, thus producing terra cotta. In order to insure the best results in the latter case, the clay must be free from impurities and the work built upon a single support which can be easily removed when the model is fired. All sorts and conditions of babies are offered to her. Every infant prodigy that ever lisped—Homer, See Homer! babies with black locks, babies with blue eyes, babies with curly hair, as dark as the devil's hair, have been generously offered her, until, if she had taken but half of them, she would be officiating in the capacity of matron of a children's home.—Exchange.

## SOME HOT TALK.

Southern California Fruit-growers Thoroughly Aroused.

The Action of the State Board of Horticulture Denounced.

Plain Statements That Will Set the Dictators to Thinking.

The Charges of Incompetency and Unfair Dealing Heiterted, and Facts Given in Support of the Various Allegations.

A special meeting of the Association of Horticultural Commissioners of Southern California was held in the Chamber of Commerce yesterday to take some action in regard to the dictatorial tactics recently adopted at the annual meeting of the State Board of Horticulture in San Francisco. It will be remembered that owing to the petition sent to the Legislature from the fruit-growers of Southern California praying for the passage of the bill appropriating a sum of money with which to continue the search for predaceous insects in foreign countries, but protesting against any more money being paid out for this purpose to the State Board of Horticulture. This raised the ire of that body, and in consequence it threatened to boycott Southern California, and to recall the commission of the deputy fruit inspectors and those of their superiors, and also threatened to rescind the action of the State fruit-growers' meeting at San Jose designating Los Angeles as the next place of meeting. This high-handed action of the State Board of Horticulture has caused considerable feeling among the fruit-growers of this section, which found free expression at yesterday's meeting. There were delegates present from all portions of Southern California, comprising the various horticultural commissioners and their deputies, besides a goodly number of fruit-growers. The whole action of the State Board of Horticulture during the past year or two was thoroughly discussed, and resulted in the adoption of the following resolutions, which were unanimously adopted and signed by all the commissioners present:

WHEREAS, the State Board of Horticulture at its annual meeting in San Francisco, held on April 28, 1893, declared that the defeat of the bill in the last Legislature appropriating \$10,000 to further the search for predaceous insects was due wholly and solely to the petition signed by the fruit-growers of Southern California, and praying that the bill be so amended as to have the money disbursed for the object named, under the direction of the State University, the Governor, or the Division of Entomology at Washington; therefore, be it

Resolved, by the Association of Horticultural Commissioners of Southern California, in convention assembled in Los Angeles, May 3, 1893, that the fruit-growers are in no way responsible for the defeat of the bill. Our hearty endorsement and pledge for its passage on the following grounds, stated in the petition:

"That we not only command, but warmly endorse the efforts made by your honorable body in making appropriations, from time to time, for the purpose of sending expert entomologists to foreign countries in search of predaceous and parasitic insects to feed upon those that are injurious to our orchards and gardens, and that we shall appreciate and help in doing all we can to effect a harmonious and introduce beneficial insects to feed upon those of an injurious character."

"That the appropriation of \$5,000 made by your honorable body some two years ago, for the same purpose, and disbursed through the agency of the State Board of Horticulture, has not only been barren of results, but has indirectly proved an injury rather than a benefit. The endeavors of the State Board of Horticulture to import predaceous insects and parasitical insects to feed upon the red and black scale and woolly aphids from Australia (not the natural home of these insects) resulted, as every scientific entomologist predicted, it failed, in failure. Nevertheless, in the face of these facts, the State Board of Horticulture, undismayed and resolute, circulated to the effect that its importations of predaceous and parasitical insects of the red and black scale and woolly aphids would render artificial means no longer necessary to subjugate these pests."

"That the fruit-growers, your petitioners, are fully indorsing the bill introduced appropriating a sum of money to still further continue the search for predaceous and parasitical insects in foreign countries, nevertheless feel constrained to protest that no more money being turned over to or expended by the State Board of Horticulture."

WHEREAS, the State board further alleged that the fruit growers and horticultural commissioners have falsely and maliciously charged the board with incompetency; therefore be it

Resolved, that the charges of incompetency made against the board are borne out by the facts, viz.: The natural enemies of the red and black scale and woolly aphids are not to be found in Australia, a country to which these pests are not native. The statements made by the officers of the board, both by word of mouth and otherwise, that these parasitical and predaceous insects are rendering artificial means unnecessary in the control of these pests in every particular, that the reports made by the board are unreliable, and their contents "scribbled" from other sources — practicing a species of literary forgery, the board has been guilty of attacking persons engaged in similar lines of investigation on false grounds and for purely personal reasons; that its statistical reports on the fruit industry are unreliable and misleading, and therefore worthless. For evidences of these charges, we ask the reader to compare the reports, while for proof of the statements that the board declare "artificial means of fighting these scales would be no longer necessary after they had become established," to the report of Dr. Koebel (endorsed by the board), and to the statement of President Ellwood Cooper, at the San Jose meeting, both of which were subsequently expunged from the minutes of that meeting.

WHEREAS, the State board falsely and maliciously gives its approbation and induces the public to believe that the defeat of the bill is due to the protest of said petitioners, a statement false in every particular; therefore be it

Resolved, that the facts in the premises make the bill was amended in the Assembly, diverted to the appropriation to the State University, the friends supporters of the State Board of Horticulture openly declared at Sacramento that "unless they (the State board,) can spend the money, no appropriation shall be made."

WHEREAS, the State Board of Agriculture charges the National Department of Agriculture with meddling and interfering with our efforts to introduce predaceous and parasitical insects, therefore, be it

Resolved, that the charge made by the State Board that the National Department of Agriculture was using its influence against our efforts to seek relief against plant diseases and insect pests is not true. So contrite are the growers of California are under obligation to the National Department of Agriculture especially to the division of entomology, and deeply regret the action of the State Board from time to time in antagonizing the Department of Agriculture or its agents stationed in this State.

WHEREAS, the State board, at its annual meeting held in San Francisco April 28, 1893, did rescind the action taken at the San Jose convention designating Los Angeles as the next place of meeting (said action being afterwards reconsidered and left to the Executive Committee for final action); therefore be it

Resolved, that the State board's efforts to rescind the action of the San Jose meet-

ing is childish and puerile. The board cannot act in this matter; we shall insist that the will of the San Jose meeting be complied.

Resolved, that these resolutions be given out for publication, as giving the actual facts in this controversy; and that fruit-growers and horticultural commissioners shall continue to exercise their duties, and that the attention of the State Board of Horticulture is respectfully called to section 3 of the bill of 1881, as amended in 1889, regulating the appointment of quarantine guardians.

## WEATHER FORECASTS.

A Period of Dangerous Storms Predicted in May.

St. JOSEPH (Mo.) May 6, 1893.—[Copyrighted, 1893, by W. T. Foster.] My last bulletin gave forecasts of a storm wave to cross the continent from May 8 to 9 and 10 to 13, the next will reach the Pacific Coast about the 14th, cross the Western mountains by the close of the 15th, the great central valleys from the 16th to the 18th, and the Eastern States about the 19th.

This will be a severe and dangerous storm. A period of dangerous storms may be expected from the 15th to 25th.

The cool wave will cross the Western mountains about the 18th, the great central valleys about the 20th, and the Eastern States about the 22d. Cool nights about the 7th and 8th, 13th to 15th, 25th to 27th, 30th to 31st, in the great central valleys, with danger of frosts in northern latitudes. Farther west these will occur one or two days earlier, and east one or two days later.

## FORTEN'S LOCAL FORECASTS.

The storm waves will reach this meridian, and the other changes noted will occur at and within one hundred miles of Los Angeles within twenty-four hours before or after sunset of the dates given below:

May 7—Moderating.

May 8—Warmer.

May 9—Storm wave on this meridian.

May 10—Wind changing.

May 11—Clouded and clearing.

May 12—Fair and cool.

May 13—Moderating.

## CHANGE OF PROPRIETORSHIP

Not Doctors, but Plain Business Men.

They Have a Cure for Cataract and Sell It on the Plainest Kind of a Business Proposition, No Cure No Pay.

The Mexican cataract cure, about which so much has been said in this and other California papers for the past few months, has finally passed into the hands of an entirely new company, who will henceforth supply the demand for it in a business-like and, perhaps, a more satisfactory way. They have organized under the name of the Aztec Cataract Cure Company of Los Angeles, and opened offices in the Stowell Block, No. 23½ South Spring street, rooms Nos. 64 and 65, opposite the Los Angeles Theatre, and induce correspondence and callers. The company has bought all the rights in and to the original Mexican cataract cure, which, hereafter, is to be called the Aztec cataract cure, and will continue its manufacture in this city and introduction throughout the world. It unquestionably is the best remedy for cataract ever yet discovered, if not, in fact, the only one that can in any measure surely relied upon always to cure. It has been thoroughly tested in this city by a large number of persons, including clergymen, physicians and other citizens of the highest character and responsibility, and the unvarying testimony of all these people is that it cures. The new company will sell the remedy wholly upon this understanding and agreement. Anybody who has cataract may try it, and without fear is benefited. Unquestionably he will not be required to pay a cent. There is no such cataract here as it is such a distressing and in every way objectionable disease, that a remedy like this that is undoubtedly value should very soon be in great demand. The only obstacle will be at first the natural skepticism people feel regarding a new thing in a line that quack doctors have so monopolized and lied about. But time will overcome this. This remedy unquestionably cures. Its use brings relief almost at once. The men who are selling it are not doctors, and do not pretend to be. On the contrary, they are plain business men, though responsible and well-known and of high standing in the community. Their word is as good as their bond. They will do business honorably and conscientiously, and the public will not be long in finding the fact out.

## MORE KEELEY INSTITUTES.

One of the busiest places in the country at the present time is the Keeley headquarters at Dwight. Every train brings passengers from all parts of the world, and every train carries away graduates who go home cured and happy. Every day also brings physicians who visit Dwight to receive a course of lectures and thorough practical instruction in the administration of the double chloride of gold treatment.

At Riverside is the only branch in Southern California of this famous institute for the cure of drunkards, the opium and morphine habit and the tobacco habit. The only agent in Los Angeles has rooms in New Wilson Block, corner First and Spring sts., Nos. 64 and 65. Write for information as to terms, etc., can be obtained.

The Garten Gold Cure will cure any case of liquor, morphine or tobacco habit. It is the surest, safest and cheapest of any known cure, and we are authorized to give you a guarantee in the first case of injury to a patient from the direct effect of the medicines used. Graduates are welcome to come and see us, and among them were some very difficult cases well known to the great world. The Garten Gold Cure, 100 W. North Spring street, Los Angeles office, room No. 18½ South Spring street. H. L. Moore, local agent.

The W. C. Furry Company sells the famous Glenwood cook stoves and ranges. The Glenwood is the world over to the very best. The art of cooking is now last longer and consume less fuel than any other stove. Do not fail to see them.

AN EXTRA large assortment of trimmed hats are on sale this week at the New York Bar, 34 W. North Spring street.

FRUITS and vegetables, wholesale and retail. Dr. Will's celebrated asparagus, finest in the world. Goods delivered. Telephone 28. Althouse Bros., 108 W. First.

"CREAM Puff" Self-Raising Flour.

I AM SO HAPPY!  
3 BOTTLES OF S.S.S.

Relieved me of a severe blood trouble, which also caused my hair to grow out again, as it had been falling out by the handful. After trying many physicians in vain, I am so happy to find a cure in S.S.S. O. H. ELBERT, Galveston, Tex.

S CURE S It is entirely vegetable and harmless.

Treatise on Blood and Skins mailed free. SWIFT SPECIFIC CO., Atlanta, Ga.

THE  
EQU. ITABLE  
LIFE ASSURANCE  
SOCIETY  
OF THE UNITED STATES.

JANUARY 1, 1893.

Assets ..... \$153,060,052.01

Reserve on all existing Policies (4 per cent standard) and all other liabilities ..... \$121,870,288.52

Total Undivided Surplus (4 per cent standard), including Special Reserve of \$2,500,000 toward establishment of a 3½ per cent valuation ..... 11,189,815.49

815,400,052.01

Income ..... \$40,286,237.49

Disbursements ..... \$24,161,947.84

New Assurance in 1892 ..... \$200,490,318.00

Outstanding Assur- ance ..... \$60,942,345.00

The Society has about double the surplus of any other life assurance company, a larger income, a larger number and amount of policies in force, and transacts a larger annual new business than any other life assurance company in the world.

But the Directors of the Society deem the quality of its risks and the economy of its management more important than the volume of new business obtained.

While the expenses of management of the Society have for a number of years been less than those of other prominent companies, they show a further improvement in 1892, indicated by a reduction of 2 per cent in the ratio of expenses to total income, which represents a saving to policyholders of \$800,000 during the year.

The chief end and aim of the management of the Society is to conduct its affairs with more judicious economy, if possible, than ever before, with special regard to the earning of SURPLUS, out of which dividends are made for policyholders.

Henry B. Hyde, President  
James W. Alexander, V.-P.

Ransom White, Resident Secretary California, Nevada and Hawaiian Islands.

NOW have for sale on contract improved and undeveloped lands in large and small tracts at LOW FIGURES.

Information cheerfully given at above-named offices.

## "Illuminating the Stomach by Electric Light."

"Medical electricians have recently devised a plan by which the interior of the human stomach may be illuminated for examination. The patient is laid upon the operating table and a slender tube, carrying a glass bead upon its end, is introduced into the stomach. A small light inside the bead is supplied by fine wires running out through the tube and connected to a small battery. The interior of the stomach is plainly lighted and all its parts are brought into view by a small movable mirror at the end of the tube." —[Quoted from the TIMES' Encyclopedia Britannica.]

The above picture is photographed from an illustration on page 610 of the supplement in the back of Volume VIII. of the TIMES' Encyclopedia Britannica. It is only one out of nearly 100 illustrations on the subject of Electricity contained in the TIMES' Edition of the Encyclopedia Britannica—thirty-six of which can be found in no other edition of Britannica in print. Among them we mention a few of the modern appliances therein so beautifully and accurately illustrated:

"Arc Light," "Wood Dynamo," "Slattery Incandescent Dynamo," "Improved Dynamo," "Incandescent Lamp," "Portable Electric Lamp," "Edison Generator," "Recording and Alarm Gauge," "Electric Elevator," "Electric Car on a Ten Per Cent Grade," "Electric Percussion Drill," "Police and Signal System," "The Death Penalty by Electricity," etc.

The articles on Electricity in its various forms in the main body of the work and in the supplementary matter bound in the back are treated in 138 pages. Every subject known to man is treated as fully, carefully and accurately in this princely library as the subject of Electricity.

Bear in mind that these 25 large volumes contain 22,000 pages, 671 maps and plans and 10,000 illustrations.

Not to own this great Reference Library is almost as unpopular in this age as not to own the Bible! But the possessor of this rare set of books stands a more even show of success in life.
